
AH-65

Manometer Gauge Stopcock According to DIN 16262 A/B & 16263

Description:

A stopcock is used for the inlet, flow or outlet in pipes to control liquids and gases. Depending on the switchs position, measuring devices can receive pressure (operating mode), or be relieved from it (de-pressuring mode). In the blow-out position, fluids and gasses can pass through the stopcock.

Features

/ Monitor and vent the pipe

/ Brass or stainless steel

/ -10°C to 50°C

/ Up to 25 bar

Application:

Stopcocks are available with or without an additional test connector (DIN 16263). This connector can be used for another measuring device, to test an installed pressure gauge. The stopcock can be installed via G¼" or G½" threads.

Technical Specifications:

Process connection / G ½" or G ¼"

max. Pressure /

G ½" Brass:	25 bar
G ½" SS:	16 bar
G ¼" Brass:	6 bar
G ¼" SS:	6 bar

max. Media temperature / -10°C to 50°C

Materials /

Body:	Brass, SS 1.4571
Handle:	PP

When connecting to a Manometer, please use flat gaskets DIN 1625!

Ordering Codes:
