°C

Features

/ Housing sizes from 2.5" to 10"

/ Directly att. sensor or capillary tube

/ Temperature sensor and process

connection, individually configurable

/ Optionally, alarm or analogue output

/ Measuring acc.: Cl. 1.0 and Cl. 0.6

/ Measuring ranges up to +800°C

/ Stainless steel housing

GT-04

Cas Expansion Thermometer with Nitrogen Filling

Description:

The GT-04 series of gas expansion thermometers consists of a housing with integrated movement and a sensor system connected directly or through a capillary tube. The sensors are filled with neutral nitrogen gas that serves as a transmission medium for the temperature data. The nitrogen gas pressure in the sensor system is evaluated by the movement and mechanically displayed.

Application:

Thanks to a wide variety of possible versions, GT-04 gas expansion thermometers can be used in nearly any type of applications where the process temperature needs to be captured locally or by means of a remote display. Moreover, limit contacts, analogue output signals or optionally available temperature recorders enable evaluation of temperature data as well as controlling processes upstream or downstream.

Ordering Codes:

Order number	GT-04.	R.	x .	100.	L.	Α.	37.	0.	0.	9x90.	BX1.	0.	0
GT-04 Gas Expansion Themometer

** Example: X [1000] = Capillary tube; Material: stainless steel 1.451; Length: 1000 mm;

Version (table 1):

with directly mounted sensor				
	connection at the bottom	Α		
	connection at the back, in the center	E		
	connection at the bottom, at 90° angle (A to D: direction of 90° angle)	т		
	connection at the back, at the center with rim at the back	F		

with capillary tube		
	connection at the bottom with wall holder	A
	connection at the bottom with rim at the back for surface-moun- ting	В
	connection at the bottom with rim in the front for flush moun- ting	D
	connection at the back with rim at the back	F
	connection at the back, in the center with rim in the front	G
	connection at the back, eccentric with triangular front ring and U-clamp for flush mounting	н

Technical Specifications:

see the following pages
see table 7
see table 8
min. 16 bar (depending on temperature, sensor diameter and length)
25 bar (special designs for higher pressure on request)
see table 5 (shorter lengths on request)

Depending	g on the mediur	n and the sensor o	diameter

different minimum sensor l	lengths are recommended.
----------------------------	--------------------------

Example:

Sensor diam	neter:	10 mm
Medium:		
	water:	L _{min} = 60 mm
	oil:	L _{min} = 100 mm
	air:	L _{min} = 160 mm

max. Sensor length /	3 m (greater lengths on request)
max. length of capillary tube /	30 m (greater lengths on request)

Accuracy /	
------------	--

NG 63, 80, NG 100, 160, 250:	Cl. 1.0
Optional NG 100, 160, 250:	Cl. 0.6
Overload safety /	30 % of operating range end value however, max. +800°C (optionally 100 %)
Protection /	IP65

Versions:

GT-04 Gas Expansion Thermometer

- **R** = Thermometer with directly mounted sensor
- **C** = Thermometer with capillary tube

Materials:

 X = housing stainless steel 1.4301, with bayonet ring, IP 65 mineral glass dial, 4 mm aluminium scale, white, lettering black aluminium indicator, black brass movement

Housing diameter:

Nominal size:	diameters: 63, 80, 100, 160, 250 mm
Customized designs: (on request)	rectangular housing: 72x72, 96x96, 144x144, 192x192, 72x144 vertical or horizontal, 96x192 vertical or horizontal temperature recorder rectangular: 192 x192, 288x288 mm, round: d = 260 mm

Damping:

X = unfilled

- L = with glycerin filling for vibration attenuation
- **S** = with silicon oil filling (increased vibration attenuation)
- **K** = with oil filling (for devices with built-in limit contacts)

Sensor:

The temperature sensors are basically made of stainless steel 1.4541. Minimum sensor length is limited by the parameter Ls (see Table 5). This parameter indicates the sensitive part of the sensor which must be immersed into the medium in any case.

While specifying, please use the following format:

Sensor diameter x sensor length (in mm) Example: 10x200

Operating ranges (table 2):

Limit contacts and analogous outputs:

Limit contacts are intended for alerting when certain threshold limits are crossed in either direction. The GT-04 thermometers in housing sizes 4" (100 mm) and 6" (160 mm) as well as the rectangular housing designs can be optionally equipped with up to 4 snap action contacts or inductive contacts integrated into the housing. The contacts will be designed as NO-contact or NC-contact (as the case may be, with reference to increasing temperature). In addition, micro-switches with higher switching load, contacts mounted on the housing or pneumatic contacts can be supplied on request.

Analogue outputs are meant for transferring the measuring data to higher-level display, evaluation or control systems. Angle of rotation measuring transmitters mounted into the housing or PT-100 measuring transmitters with sensor integrated PT-100 sensor are available.
