

LEVEL 2025

LEVEL INDICATORS

MA-400

Bypass-Magnetic Level Gauge

Description:

A stainless steel measuring tube has two lateral connecting sleeves, which are joined with the vessel to be monitored. Since in this reference vessel the same fluid level is found as that in the tank, a cylindrical float is located always at the height with the liquid level. The float is counter-balanced exactly to the density of the medium and it carries a specially designed disc shaped magnetic system that acts through the stainless steel wall of the measuring tube on an indicator bar which is sensitive to magnetic force. Due to the magnetic force of the float, its pre-magnetized rollers are turned by 180° in such a matter, that all rollers below the float turn their red and the remaining rollers above the float turn their white side to the front. Thus, the observer obtains a precise visual statement of the level in the container. Optionally, the reference tube can be equipped with bistable, magnetic sensitive limit contacts which emit a binary signal when the float has passed the level where the sliding contacts are mounted. Another alternative to the remote transmission of value is adding a reed contact chain FM-02N externally to the measuring tube that would convert the float movement into a stepped resistance or current signal. Instead of the reed contact chain, also a magnetostrictive sensor can be used which breaks up the level at a higher accuracy and provides a 4...20 mA power signal in 2-wire circuit.

Features

/ Up to 25 meter measuring length

/ Up to +400 bar

/ Up to +400°C liquid temperature

/ Stainless steel, titanium,

Alloy C, PVC, PP, PVDF, ECTFE, PFA

/ Flange, thread and welded connections

/ Switching contacts

and measuring transmitter

/ Electrical trace heating

and insulation possible

/ Customized designs

Application:

The MA-400 series of magnetic level gauges has been long in use in large numbers in the entire industry, thus Bypass Float Level technology has a proven record of accurately measuring level in field for over 30 years. Meanwhile, the technology of remote transmission, for example, by using magnetostrictive sensors has been perfected to such extent that it is no way inferior to other methods of level measurement and monitoring. Moreover, the advantage here is that the level can be identified at one glance directly at the measuring point. The electrical signals in the control room can be verified visually without much assembling work. Besides pressure levels up to PN400, also all conceivable variants of draining and ventilation such as valves, ball-cocks or compression and cutting ring fittings are available with us. Just contact us for more details.

Versions:

Measuring range (ME):

The distance between the upper and the lower lateral connection is specified in millimeters. The maximum length of a measuring tube is 6000 mm for greater lengths up to 25000 mm, however, several reference tubes must be used. For a length of 2000 mm and above, we recommend equipping the magnetic level gauge with a welded bracket for additional securing (Option /7). If the free space (dugout) between the lower connecting piece and the base or the space (projection) between the upper connecting piece and the ceiling are in one way or the other restricted, the relevant maximum parameter must be specified in detailed text at the time of placing an order. In an empty vessel, the float for the MA-400 is located in the so-called float-sack below the connection and in a full tank in the projection above the connection. This means that these dimensions must correspond with at least the float length. However, since the float's mounting length also depends on the media density, special materials like titanium must be used in case of space constraints, if necessary, in order to reduce the float length.

Measuring tube material:

The measuring tube can be selected from the following materials: stainless steel, coated stainless steel, titanium, Alloy C and various plastics. The decision basis are here the medium, maximum measuring range, pressure and temperature.

Measuring tube diameter:

Depending on the material execution and the pressure in the tank different measuring tube diameter are chosen. The corresponding options are the variants taken from the datasheet.

Process connection:

Flanges as per EN or ANSI, female and male threads or welded ends are the most commonly used features for connecting the MA-400 to the side of the vessel. Customized solutions like aligning the connecting piece on top/ below or on top/laterally or at the bottom/laterally are available on request.

Nominal diameter and pressure level for flange:

The precise name of the connecting flange on the vessel must be specified in a detailed text. Some examples are flange DIN EN 1092-1 DN25 PN16 form B1 or ANSI 1" 300 lbs RF. Standard flanges are DIN EN 1092-1 DN15 PN16 with sealing bar form B1.

Thread for screw neck or bushing:

If a screw neck or a bushing is selected as a variant for the connection, the thread size must be specified in detailed text. Here the standard is G3/4". All normally used inch or metric thread systems are available on request.

Measuring tube connection top:

An overview of the various possible variants of the upper measuring tube connection, such as with ventilation screw, valve or flange, is located on the last page of this data-sheet.

Measuring tube connection bottom:

An overview of the various possible variants of the lower measuring tube connection, such as with drain plug, valve or flange is located on the last pages of this data sheet.

Float type and length:

The matching float is selected from the float tables of this datasheet. The criteria are material resistance to the medium, pressure, temperature and diameter of the float (must fit into the selected measuring tube). From the float length the user determines the surfacing volume of the float at a known specific gravity of the medium being measured. The ideal surfacing volume at which liquid level and magnet system are on one level is shown in bold. Also, the length of the float-sack below the lower connection and in a full tank the projection above the upper connection depends on the selected float length. Should the application be subject to space limitations, it is advisable to choose a lighter float material such as titanium, thus saving on float length.

Indicator bar:

Depending on the ambient temperature at the measuring tube outer wall, indicator bars are chosen with ceramic rollers for temperatures up to 400°C or standard rollers for temperatures up to 200°C. Rotary secured versions guarantee a clean turn around of the magnetic rollers even due to vibration. For rough atmosphere versions with stainless steel jacketed housings are available.

Approvals:

Various approvals are available for the magnetic level gauge type of MA-400 such as ATEX, GL, DNV, GOST, BV, ABS and, if necessary, they are tested with regard to the Pressure Equipment Directive. Since the devices are modular assembled (contacts, sensors, indicator bar etc.) it must be ensured, that all components used meet the required approval.

Options:

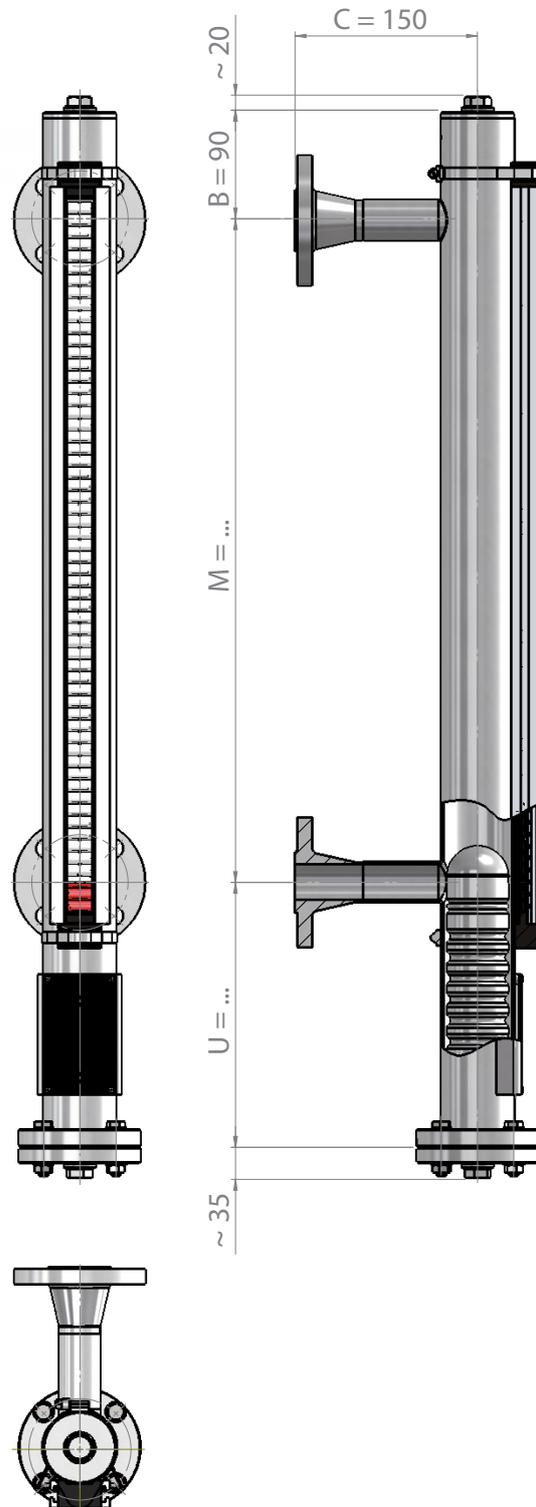

With regard to options, specify in detail whether the MA-400 should be provided with electrical limit contacts and as to how many (option /1). A circuit with a protective resistor or a combination of resistors, which offers a behavior according to NAMUR, is available for the contacts (option /2 and /3). Optionally, for remote transmission of level value a reed contact measuring transmitter (option /4 and /5) or a magnetostrictive sensor (option /6) can be mounted externally to the MA-400 which provides a 4 to 20 mA signal at the output (see also FM-01F and FM-02N for details). Mounting brackets stabilize the magnetic level gauge for lengths above 2 meters (option /7). With strong shocks in the container damping springs are recommended at the top and bottom of the measuring tube (option /8 and /9). Solid and removable insulation against cold and heat (option /10, /11 and /12), trace heating against frost (option /13 and /14), angular scales with various engravings (option /15, /16 and /17) and a cover for concealed or isolated indicator bars (option /18) round off the equipment possibilities.

Bypass-Magnetic Level Gauge made of st. steel PN16

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 400 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 60,30 \times 2 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm / NACE}$ $\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

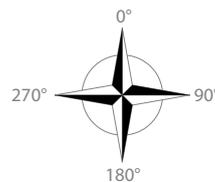

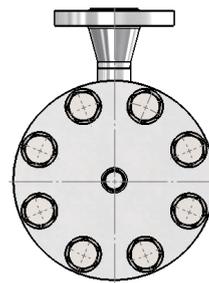

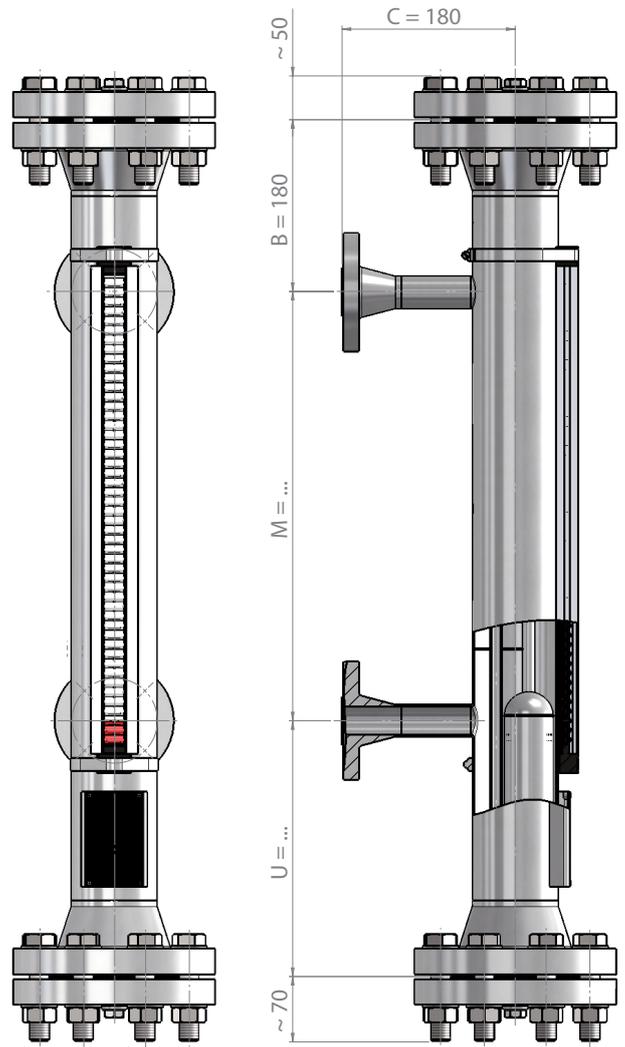

Bypass-Magnetic Level Gauge made of Stainless Steel in Liquid Gas Design

Technical Specifications:

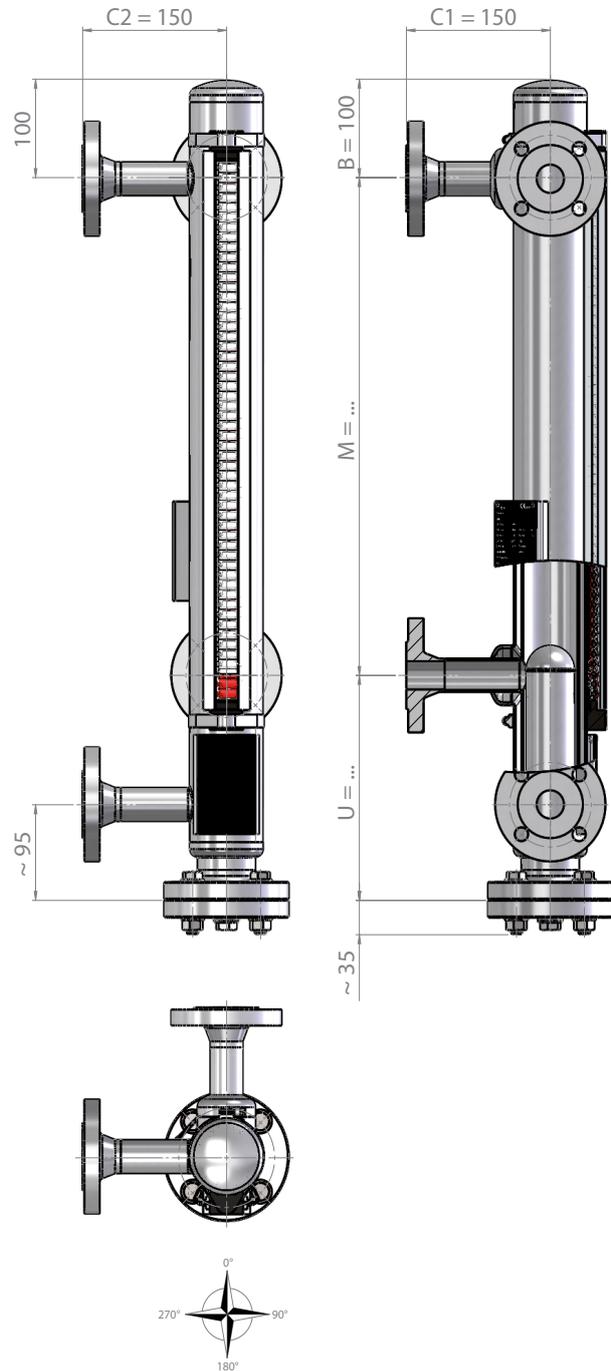

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	≥ 460 kg/m ³
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+400°C
Chambers /	Ø 88,90 x 2 mm Ø 88,90 x 3,05 mm / NACE Ø 88,90 x 2,60 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

**Bypass-Magnetic Level Gauge made of Stainless Steel with Steam Tracing System**

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 460 \text{ kg/m}^3$
Design pressure /	-1. . .+ bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 60,30 \times 2 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm / NACE}$ $\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Heating coat /	Heating coat pipe $\varnothing 76,10 \times 2 \text{ mm}$
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

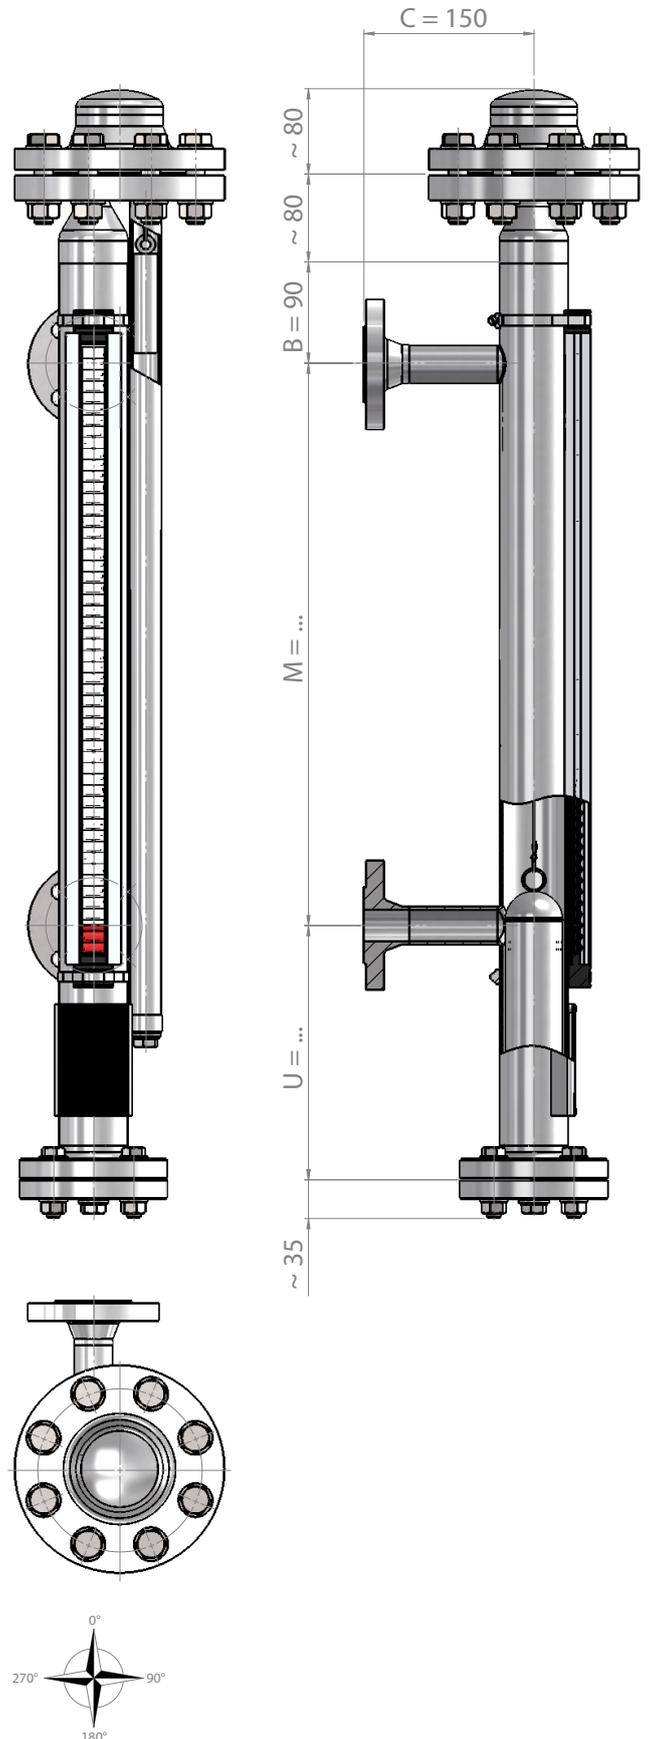

Bypass-Magnetic Level Gauge made of Stainless Steel, differential compensated

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	≥ 350 kg/m ³
Design pressure /	-1. . .+250 bar
Design temp. /	-10. . .+400°C
Chambers /	Ø 60,30 x 2 mm Ø 60,33 x 2,77 mm / NACE Ø 73,03 x . . . mm / NACE Ø 76,10 x . . . mm (. . . = calculated wall thickness)
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST

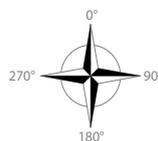

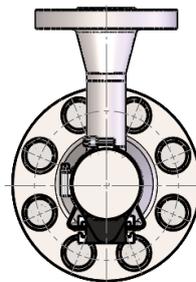

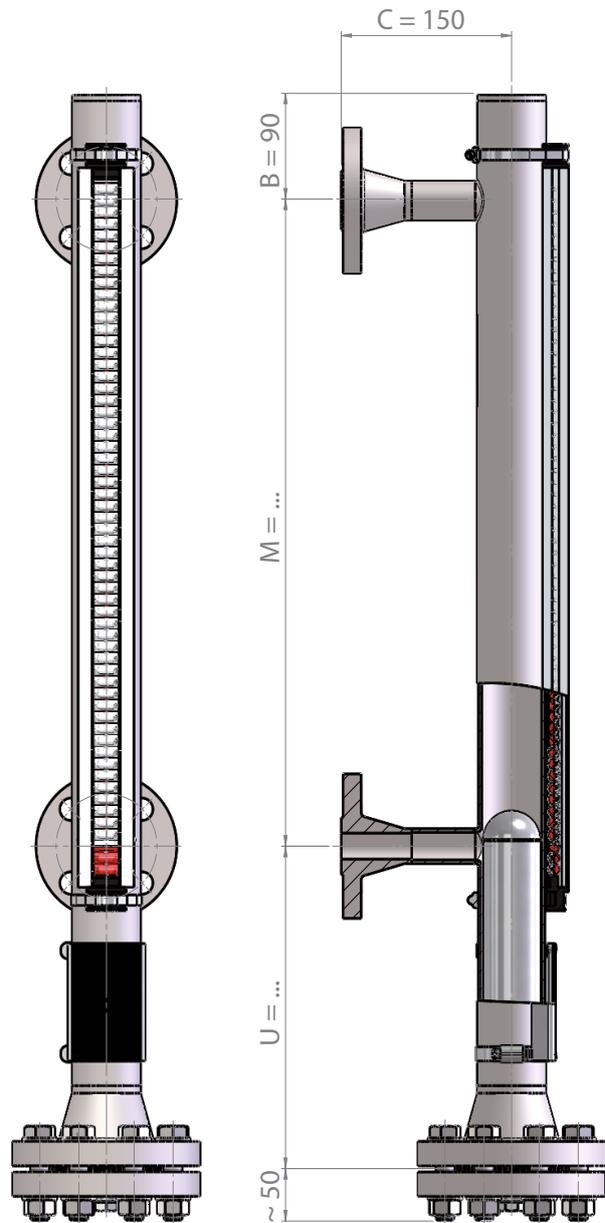

Bypass-Magnetic Level Gauge made of Titanium PN16. . .PN40

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm, for ATEX > 4000 mm choose diff. material for chamber and float
specific Weight /	$\geq 400 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+400°C
Chambers /	$\varnothing 60,30 \times 2 \text{ mm}$ $\varnothing 60,33 \times 2,77 \text{ mm / NACE}$ $\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 300°C, PED, GOST, GL, DNV, BV, ABS

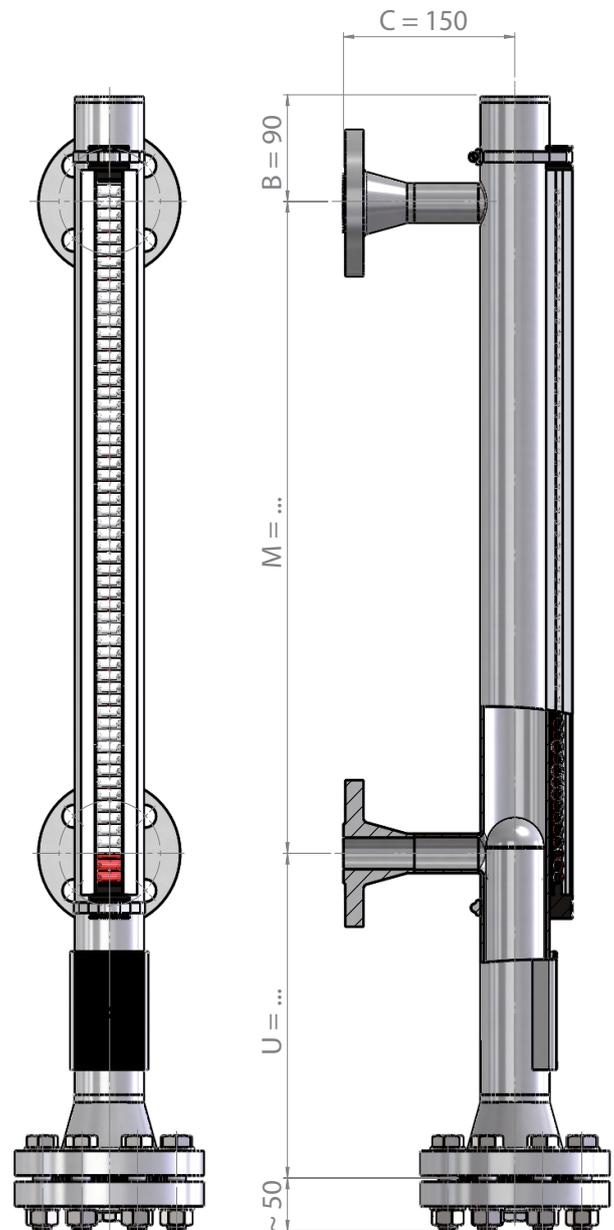

Bypass-Magnetic Level Gauge made of Alloy C PN16. . .PN40

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center dist. /	150. . .25000 mm
specific Weight /	$\geq 610 \text{ kg/m}^3$
Design pressure /	-1. . .+40 bar
Design temp. /	-196. . .+200°C
Chambers /	$\varnothing 60,30 \times 2,77 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“
Chamber end bttm. /	see appendix I „Chamber end bottom“
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 200°C, PED, GOST

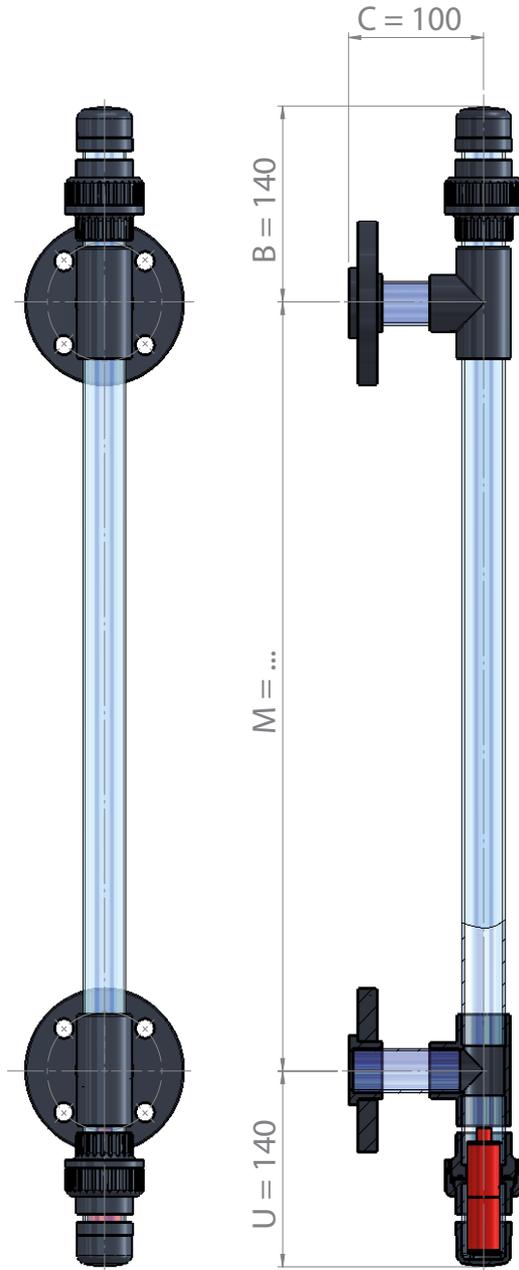

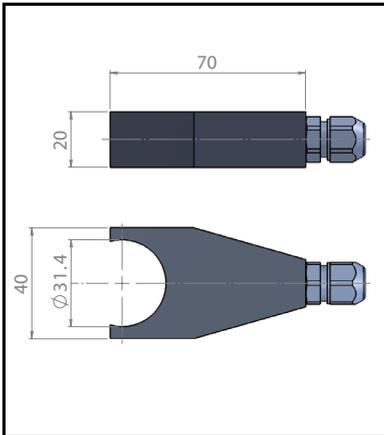

Bypass-Transparent Level Indicator made of PVC

Technical Specifications:

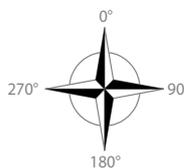

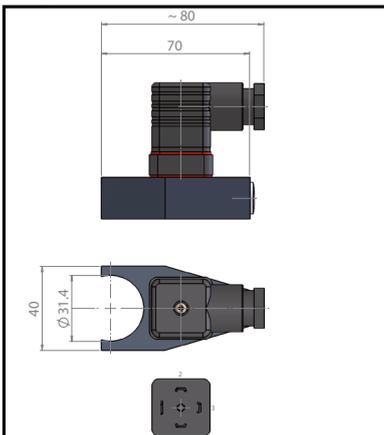

Material /	PVC transparent
Flange center dist. /	200..4000 mm
specific Weight /	≥ 600 kg/m ³
Design pressure /	-1..+1 bar
Design temp. /	-15..+60°C
Chambers /	Ø 32,0 x 1,8 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
opt. Insulation /	Ø 24 mm 80 mm long for spec. weight ≥ 900 kg/m ³ 120 mm long for spec. weight ≥ 600 kg/m ³
Switching contacts /	normally open, normally closed or co-contacts, 230 V, 0.5 A, 40 VA electrical connection: PVC cable or plug Hirschmann DIN 43650

Cable connection:

Plug connection:

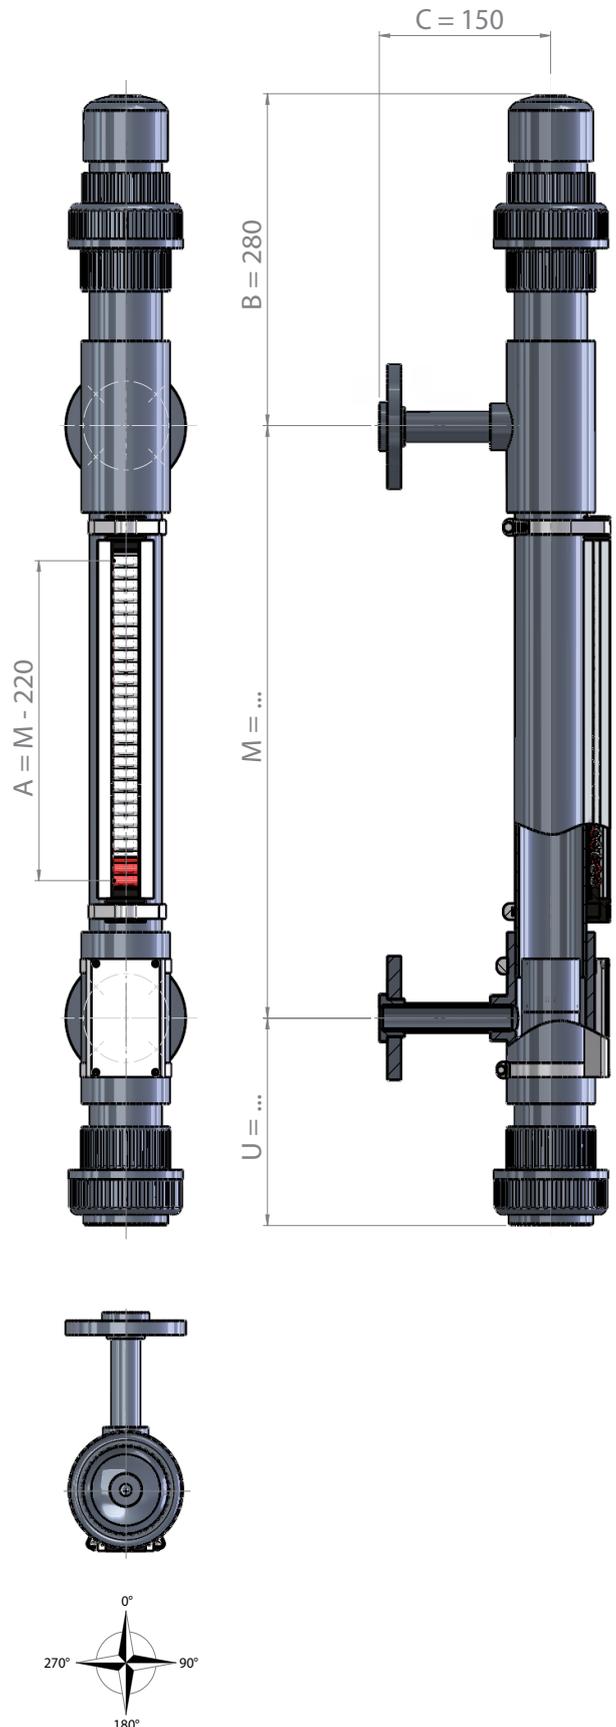

Bypass-Magnetic Level Gauge made of PVC

Technical Specifications:

Materials /	PVC
Flange center dist. /	300. . .4000 mm
specific Weight /	$\geq 740 \text{ kg/m}^3$
Design pressure /	-1. . .+4 bar
Design temp. /	-15. . .+40°C
Chambers /	$\varnothing 63,0 \times 3 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
available Approvals /	PED, GOST

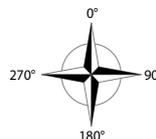

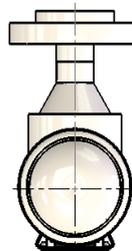

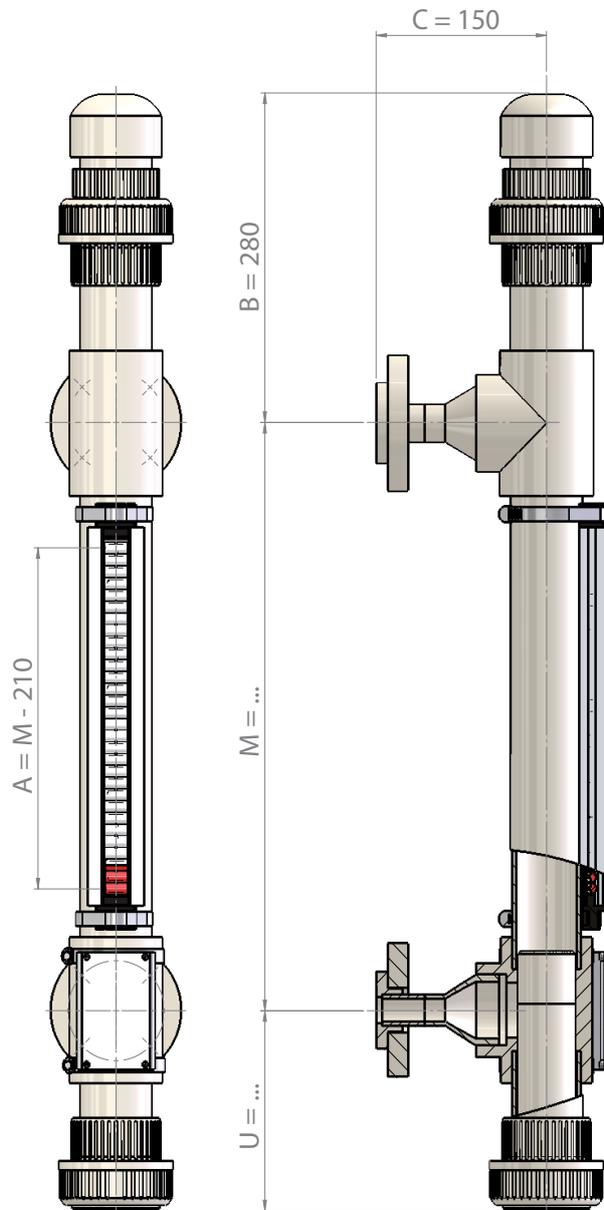

Bypass-Magnetic Level Gauge made of Polypropylene

Technical Specifications:

Material /	Polypropylene
Flange center dist. /	300...4000 mm
specific Weight /	$\geq 640 \text{ kg/m}^3$
Design pressure /	-1...+4 bar
Design temp. /	-10...+60°C
Chambers /	$\varnothing 63,50 \times 3,60 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40...+200°C Aluminium or st. steel / ceramic Temp. -40...+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60...+300°C
opt. Level transmitter /	FM-02N
available Approvals /	PED, GOST

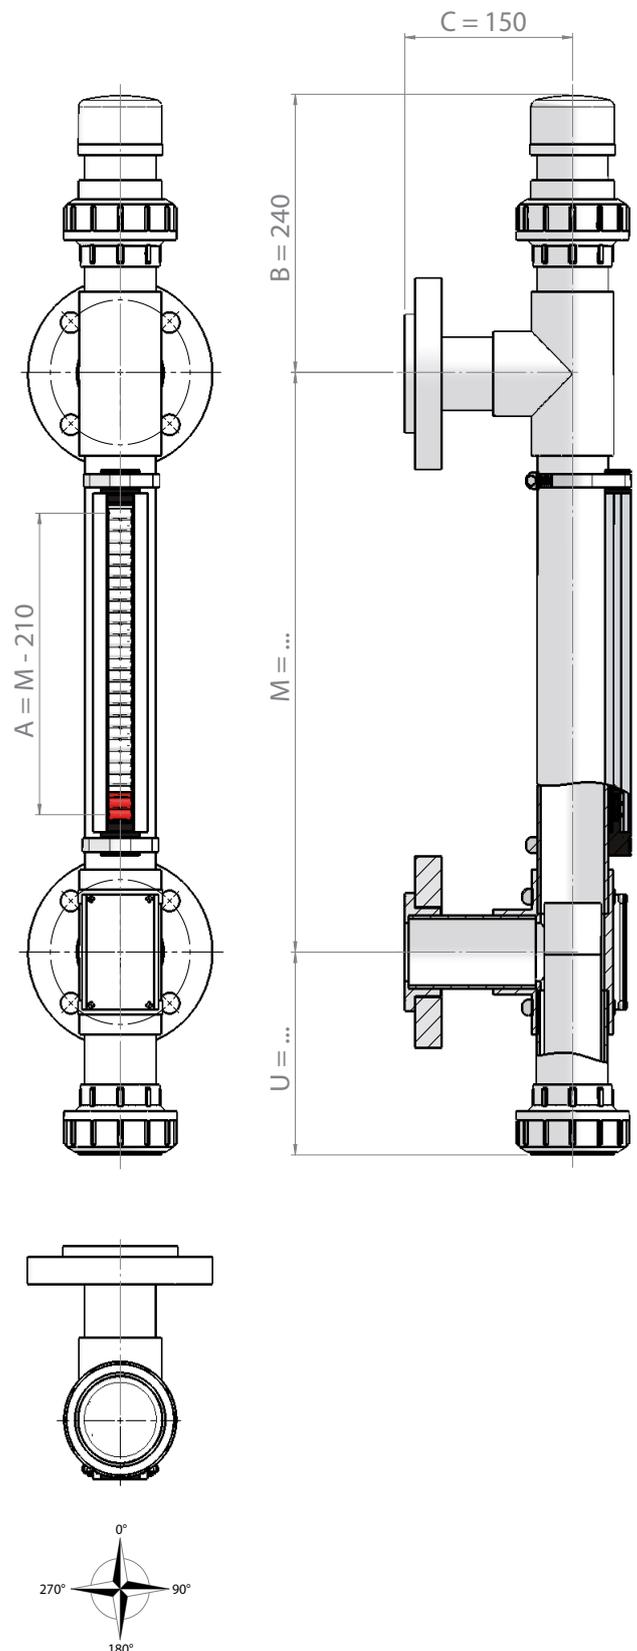

Bypass-Magnetic Level Gauge made of PVDF

Technical Specifications:

Material /	PVDF
Flange center dist. /	300...4000 mm
specific Weight /	$\geq 750 \text{ kg/m}^3$
Design pressure /	-1...+4 bar
Design temp. /	-10...+80°C
Chambers /	$\varnothing 63,00 \times 3 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	screw joint
Chamber end bttm. /	screw joint
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40...+200°C Aluminium or st. steel / ceramic Temp. -40...+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60...+300°C
opt. Level transmitter /	FM-02N
available Approvals /	PED, GOST

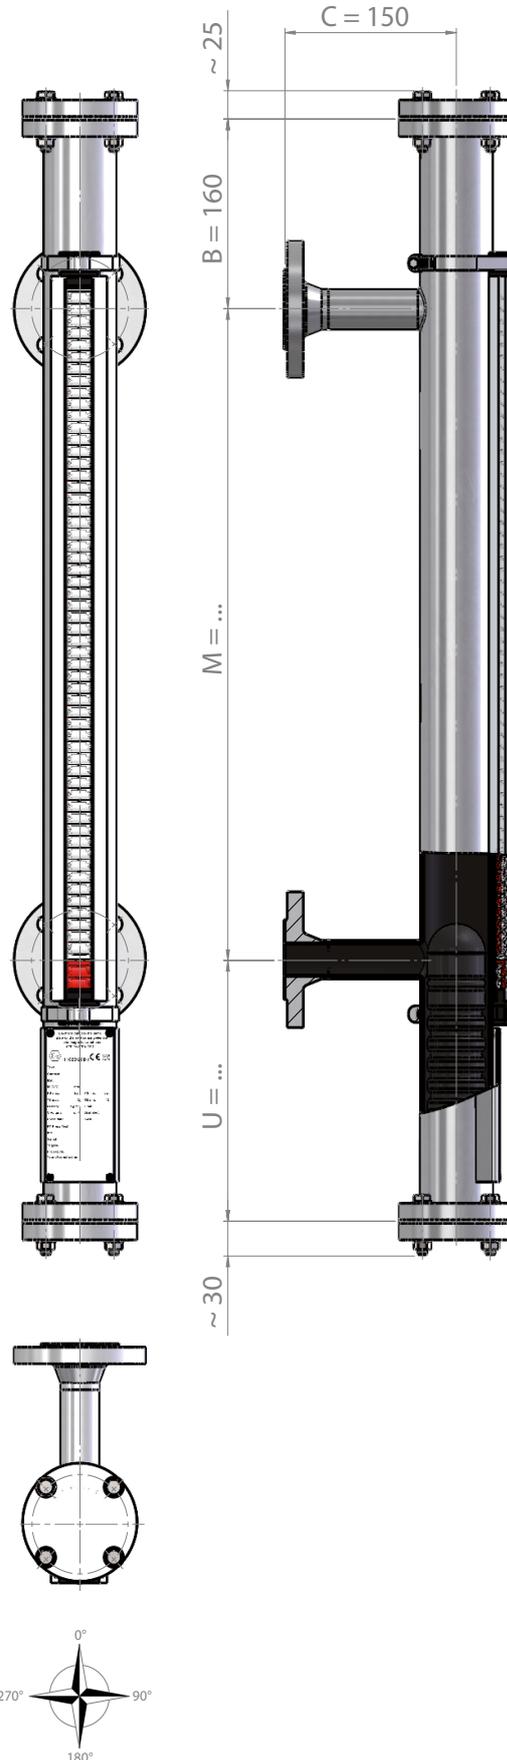

Bypass-Magnetic Level Gauge made of st. steel, ECTFE-coated

Technical Specifications:

Material /	st. steel, ECTFE-coated
Flange center dist. /	150. . .3000 mm
specific Weight /	≥ 690 kg/m ³
Design pressure /	-1. . .+16 bar
Design temp. /	-78. . .+150°C
Chambers /	Ø 63,50 x 2 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	flange connection
Chamber end bttm. /	flange connection
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 150°C, PED, GOST

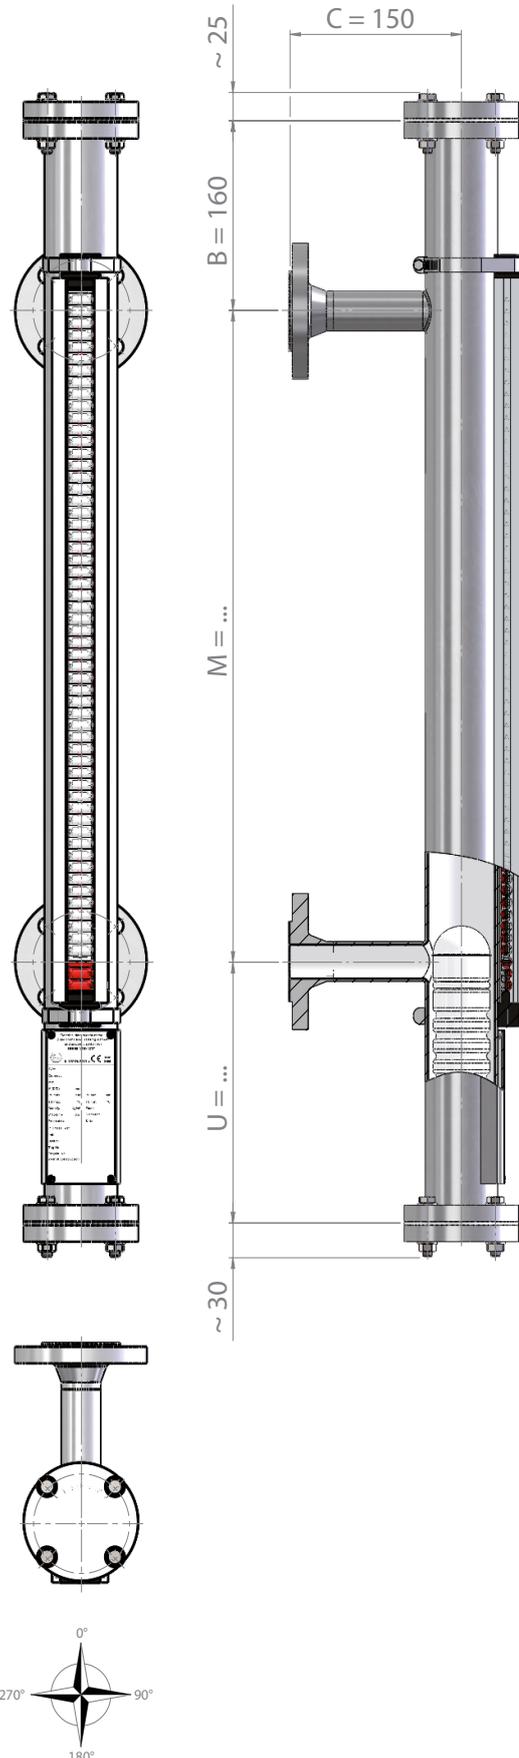

Bypass-Magnetic Level Gauge made of st. steel, PFA-coated

Technical Specifications:

Material /	st. steel PFA-coated
Flange center dist. /	150. . .3000 mm
specific Weight /	$\geq 715 \text{ kg/m}^3$
Design pressure /	-1. . .+16 bar
Design temp. /	-100. . .+250°C
Chambers /	$\varnothing 63,50 \times 2 \text{ mm}$
Process connection /	see appendix G „Process connections“
Chamber end top /	flange connection
Chamber end bttm. /	flange connection
Float /	see appendix A „Cylindrical floats“
Magnetic roller indicator /	Aluminium or st. steel / Pocan® Temp. -40. . .+200°C Aluminium or st. steel / ceramic Temp. -40. . .+400°C
Angular scale /	Aluminium / st. steel with adhesive foil, engraving or blank
Switching contacts /	Aluminium / st. steel -60. . .+300°C
opt. Level transmitter /	FM-02N
opt. Trace heating /	holding temp. -10°C / frost protect.
opt. Insulation /	Armaflex® or rock-wool
available Approvals /	ATEX II 1G2D/2GD c or ATEX II 2GD c media temperature max. 250°C, PED, GOST

**Appendix A - Cylindrical float:****Cylindrical float made of PVC, PN4, Type ZPVC50PN4:**

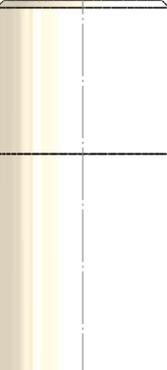

Float length (mm)	150	200	250	300	350
Float weight (g)	275	316	356	397	437
emerged float height (mm)		specific weight of media (kg/m ³)			
10	10	-	-	-	-
20	20	-	-	-	-
30	30	1170	950	820	700
40	40	1270	1010	860	720
50	50	1400	1070	910	810
60	60	1560	1150	950	840
70	70	1750	1240	1010	880
80	80	2000	1340	1070	920
90	90	2330	1460	1130	960
100	100	2800	1610	1210	1010

Float diameter:	50 mm
Design temperature:	-15. . .+40°C
Design pressure:	-1 bar. . .+4 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	float length minus 25 mm

Cylindrical float made of PP, PN4, Type ZPP50PN4:

Float length (mm)	150	200	250	300	350
Float weight (g)	246	279	311	344	376
emerged float height (mm)		specific weight of media (kg/m ³)			
10	10	-	-	-	-
20	20	-	-	-	-
30	30	1040	840	720	600
40	40	1140	890	750	620
50	50	1250	950	790	640
60	60	1390	1010	830	660
70	70	1570	1090	880	680
80	80	1790	1180	930	710
90	90	2090	1290	990	740
100	100	2510	1420	1060	770

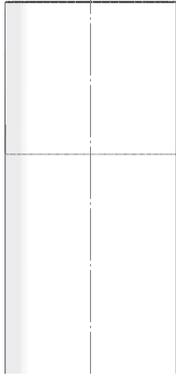

Float diameter:	50 mm
Design temperature:	-10. . .+60°C
Design pressure:	-1 bar. . .+4 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	float length minus 25 mm

Cylindrical float made of PVDF, PN4, Type ZPVDF50PN4:

Float length (mm)	150	200	250	300	350
Float weight (g)	278	319	360	401	442
emerged float height (mm)		specific weight of media (kg/m ³)			
10	10	-	-	-	-
20	20	-	-	-	-
30	30	1180	960	830	760
40	40	1290	1020	870	790
50	50	1420	1080	920	820
60	60	1570	1160	960	850
70	70	1770	1250	1020	890
80	80	2020	1350	1080	930
90	90	2360	1480	1150	970
100	100	2830	1620	1220	1020

Float diameter:	50 mm
Design temperature:	-10...+80°C
Design pressure:	-1 bar...+4 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	float length minus 25 mm

Cylindrical float made of st. steel 1.4571 (316Ti), PN16, Type ZVA52PN16:

Float length (mm)	150	200	250	300	350	400	450
Float weight (g)	253	297	327	362	399	440	472
emerged float height (mm)		specific weight of media (kg/m ³)					
10	10	-	-	-	-	-	-
20	20	-	-	-	-	-	-
30	30	1170	950	800	720	680	600
40	40	1280	1010	840	740	700	610
50	50	1420	1080	880	780	720	630
60	60	1600	1160	930	810	750	650
70	70	1820	1260	980	850	780	660
80	80	2110	1370	1050	890	810	680
90	90	2520	1500	1110	930	840	700
100	100	-	1670	1190	980	870	720

Float diameter:	52 mm
Design temperature:	-40...+250°C (+300°C)
Design pressure:	-1 bar...+20 bar (+18,5 bar)
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	float length minus 24 mm
Distance U with dampening spring:	float length minus 10 mm

Cylindrical float made of st. steel ECTFE-coated, PN16, Type ZVAE53PN16:

Float length (mm)		150	200	250	300	350	400	450
Float weight (g)		277	329	367	410	456	505	545
emerged float height (mm)		specific weight of media (kg/m³)						
10	10	-	-	-	-	-	-	-
20	20	-	-	-	-	-	-	-
30	30	1200	1000	850	770	730	700	660
40	40	1350	1070	900	800	760	720	670
50	50	1490	1140	940	840	780	740	690
60	60	1680	1230	1000	870	810	760	710
70	70	1910	1330	1050	910	840	780	730
80	80	2220	1450	1120	960	870	810	750
90	90	2650	1590	1190	1000	910	830	770
100	100	-	1770	1280	1060	950	860	790

Float diameter:	53 mm
Design temperature:	-40. . .+150°C
Design pressure:	-1 bar. . .+20 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of st. steel PFA-coated, PN16, Type ZVAP53PN16:

Float length (mm)		150	200	250	300	350	400	450
Float weight (g)		284	338	378	424	471	523	565
emerged float height (mm)		specific weight of media (kg/m³)						
10	10	-	-	-	-	-	-	-
20	20	-	-	-	-	-	-	-
30	30	1250	1035	885	805	750	715	680
40	40	1385	1105	930	835	775	735	695
50	50	1535	1185	975	870	800	760	715
60	60	1725	1275	1030	905	830	780	735
70	70	1965	1375	1090	950	860	805	755
80	80	2285	1500	1160	995	890	830	775
90	90	2730	1650	1235	1040	925	860	795
100	100	-	1830	1325	1095	965	890	820

Float diameter:	53 mm
Design temperature:	-40. . .+250°C
Design pressure:	-1 bar. . .+20 bar
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of Titanium, PN16, Type ZT52PN16:

Float length (mm)	150	200	250	300	350	400	450
Float weight (g)	197	245	289	338	381	430	474
emerged float height (mm)		specific weight of media (kg/m ³)					
10	10	-	-	-	-	-	-
20	20	-	-	-	-	-	-
30	30	645	535	475	430	410	395
40	40	710	570	500	450	425	405
50	50	785	610	525	470	440	415
60	60	885	655	555	490	455	430
70	70	1005	710	585	510	470	440
80	80	1170	775	625	535	490	455
90	90	1400	850	665	560	510	470
100	100	1735	945	710	590	530	485

Float diameter:	52 mm
Design temperature:	-30...+150°C (+200°C)
Design pressure:	-1 bar...+16 bar (+10 bar)
Distance U:	see figure of magnetic level gauge
Distance U with float stop:	Float length minus 24 mm
Distance U with dampening spring:	Float length minus 10 mm

Cylindrical float made of Alloy C, PN16, Type ZA52PN16:

Float length (mm)	150	200	250	300	350	400	450
Float weight (g)	197	245	289	338	381	430	474
emerged float height (mm)		specific weight of media (kg/m ³)					
10	10	-	-	-	-	-	-
20	20	-	-	-	-	-	-
30	30	900	770	695	660	625	605
40	40	985	825	730	685	645	625
50	50	1095	880	770	710	665	640

**Appendix B - indicator bars:****Versions**

MA-01	Standard
MA-01N	Standard turn proof
MA-01EX	EX
MA-01NEX	EX turn proof
MA-01K	Ceramic rollers up to 400°C
MA-01KN	Ceramic rollers up to 400°C, turn proof

Technical Specifications

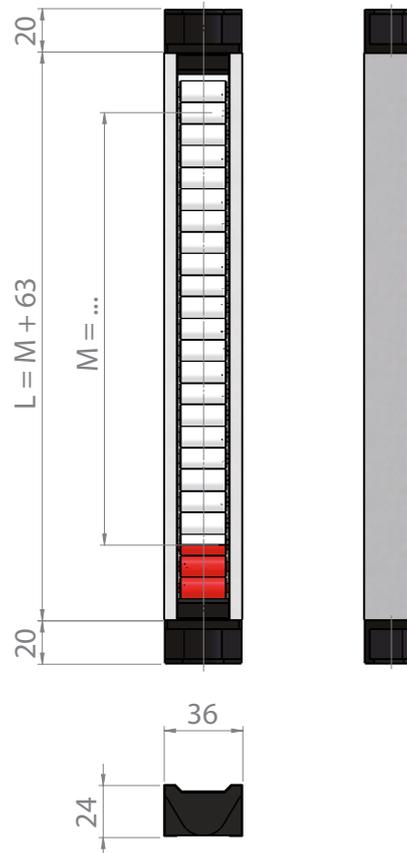

Housing /	Aluminium colorless matted
Prot. class /	IP67
Rollers /	Pocan® white / red, MA-01K and MA-01KN ceramic weiss / blue
End part /	Ryton®, black, MA-01K and MA-01KN Aluminium
Viewing glass /	MA-01 and MA-01N Makrolon, else glass
Ambient temp. /	-40...+200°C, MA-01K and MA-01KN -40...+400°C
Media temp. /	-40...+300°C
Turn protect. /	MA-01N, MA-01EXN and MA-01KN max. 180° poss.
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

**Versions**

MVA-01	Standard
MVA-01N	Standard turn proof
MVA-01EX	EX
MVA-01NEX	EX turn proof
MVA-01K	Ceramic rollers up to 400°C
MVA-01KN	Ceramic rollers up to 400°C, turn proof

Technical Specifications

Housing /	Aluminium coated with st. steel
Prot. class /	IP67
Rollers /	Pocan® white / red, MVA-01K and MVA-01KN ceramic weiss / blue
End part /	Ryton®, black, MVA-01K and MVA-01KN Aluminium
Viewing glass /	MVA-01 and MVA-01N Makrolon, else glass
Ambient temp. /	-40...+200°C, MVA-01K and MVA-01KN -40...+400°C
Media temp. /	-40...+300°C
Turn protect. /	MVA-01N, MVA-01EXN and MVA-01KN max. 180°
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

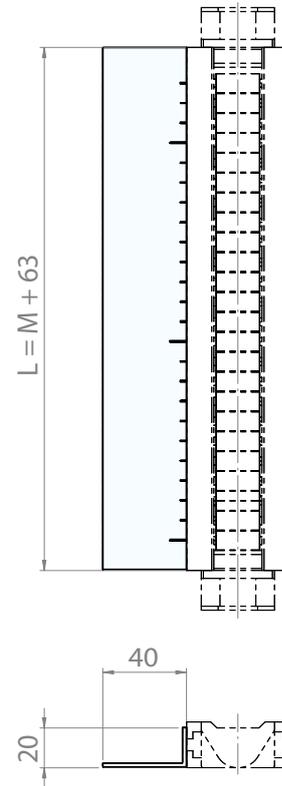

Appendix C - Angular scales and Sight extension:

Angular scale Versions

WK-AK	Aluminium with adhesive foil (black)
WK-AG	Aluminium engraved
WK-EG	st. steel engraved

Technical Specifications

Angle profile /	WK-AK: Aluminium WK-AG: Aluminium WK-EG: st. steel
Scaling /	WK-AK: in cm (0 cm. . .10 cm. . .20 cm. . .) WK-AG: blank / % / cm / inch WK-EG: blank / % / cm / inch
Width /	40 mm
Ambient temp. /	WK-AK: -40. . .+200°C WK-AG: -40. . .+200°C WK-EG: -40. . .+400°C
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

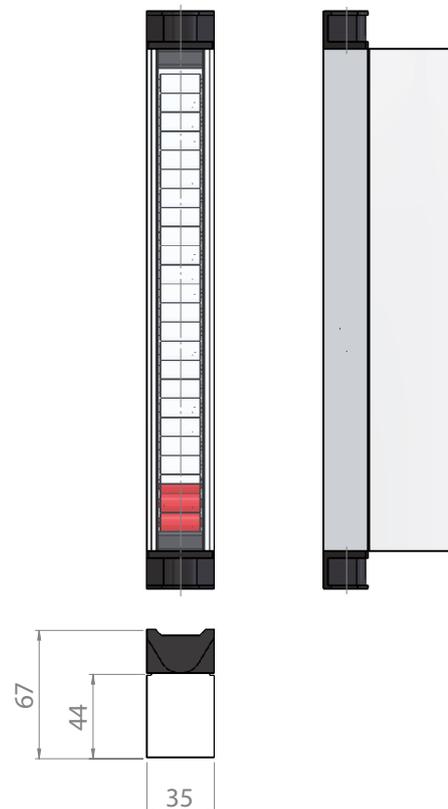

Sight extension Versions

PV	Extension for indicator bars
----	------------------------------

Technical Specifications

Material /	Acrylglas
Width /	35 mm
Depth /	67 mm
Ambient temp. /	-40. . .+100°C
Mounting /	with indicator bar
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS

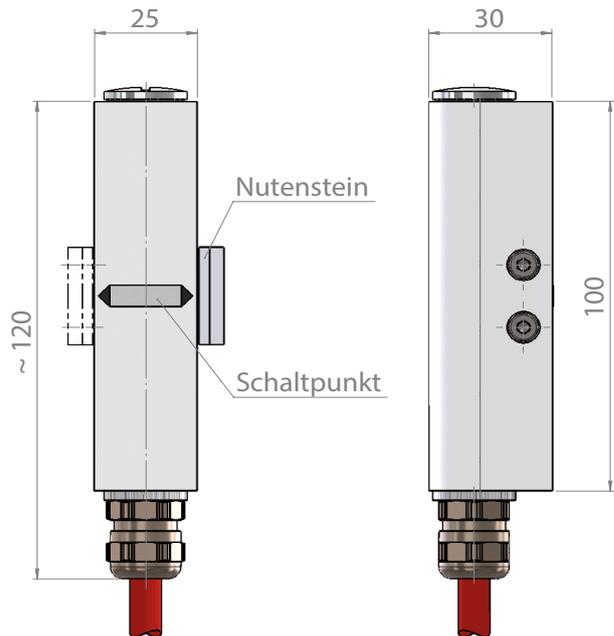

Appendix D - Switching contacts:

Versions fitted to the indicator bar

MRK-S01 Standard with Cable connection
MRK-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. (ATEX) /	PVC -20...+80°C (-20...+80°C) SIL -60...+180°C (-25...+180°C) PUR -40...+80°C (-25...+80°C) Radox® -35...+120°C (-25...+120°C)
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

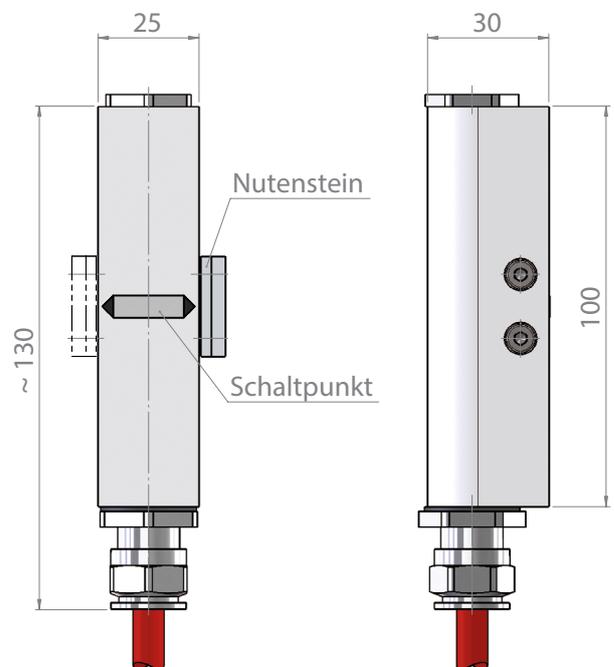

Versions fitted to the indicator bar

MRK-S01EXD press.-proof encapsulation from ATEX

Technical Specifications

Housing /	Aluminium anodised
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. /	PVC -20...+80°C SIL -25...+120°C PUR -25...+80°C Radox® -25...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{FN} 50 W/VA / P_{PN} 700 mW with Namur switch U_N 15 VDC / I_N 60 mA with protective resistor U_N 250 V / I_N 100 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

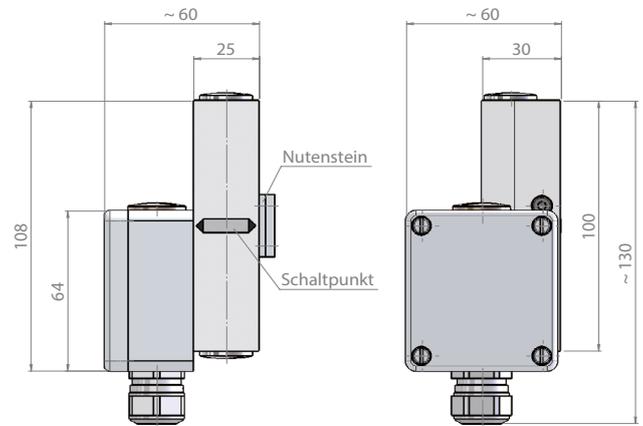

Switching contacts:

Versions fitted to the indicator bar

MRV-S01 Standard with cable gland
MRV-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing / Aluminium anodised
El. conn. / cable gland M20 x 1,5
Mounting / right or left side to the indicator bar
Prot. class / IP65
Ambient temp. (ATEX) / -40...+130°C (-25...+130°C)
Function / co-contact, increasing level, bistable
Switch rating / 230 V / 0.5 A / 40 VA
Switch rating (EX) / Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis / 5...7 mm
poss.
Approvals / ATEX, GOST, GL, BV, DNV, ABS, SIL1

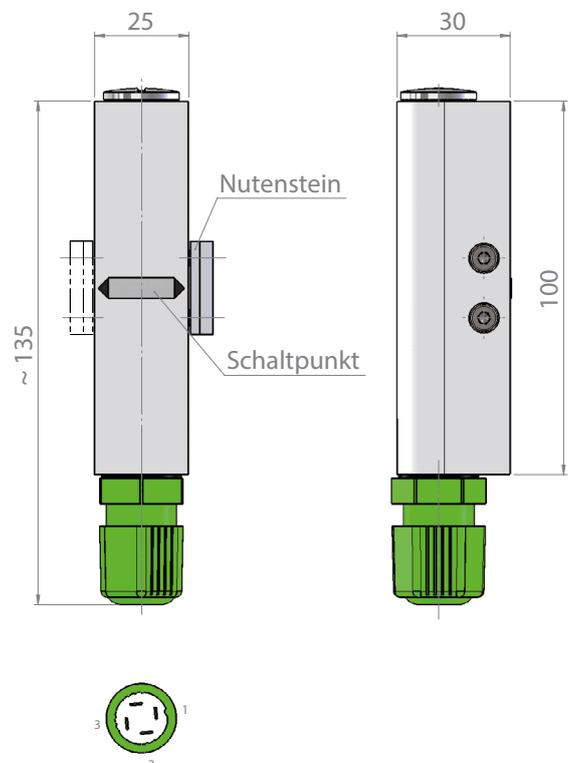

Versions fitted to the indicator bar

MRQ-S01 Standard with QuickOn-connection
MRQ-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing / Aluminium anodised
El. conn. / QuickOn
Mounting / right or left side to the indicator bar
Prot. class / IP65
Ambient temp. / -25...+50°C
Function / co-contact, increasing level, bistable
Switch rating / 230 V / 0.5 A / 40 VA
Switch rating (EX) / Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis / 5...7 mm
poss.
Approvals / ATEX, GOST

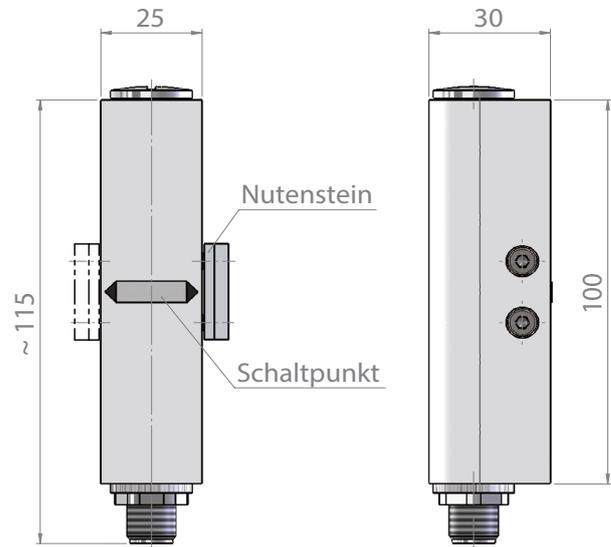

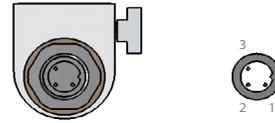

**Switching contacts:****Versions fitted to the indicator bar**

MRM-S01 Standard with M12-Plug connection
MRM-S01EXI Intrinsically safe acc. to ATEX

Technical Specifications

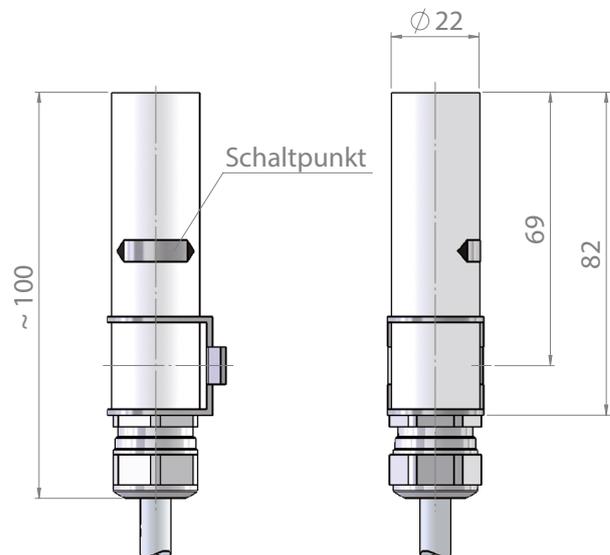

Housing /	Aluminium anodised
El. conn. /	plug M12
Mounting /	right or left side to the indicator bar
Prot. class /	IP65
Ambient temp. /	-25...+90°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, SIL1

**Aluminium Versions fitted to the indicator bar**

MGK-A60 Chambers up to 73 mm, Cable connection
MGK-A60EXI Intrinsically safe acc. to ATEX
MGK-A73 Chambers ab 73 mm, Cable connection
MGK-A73EXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	PVC -20...+80°C SIL -40...+180°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

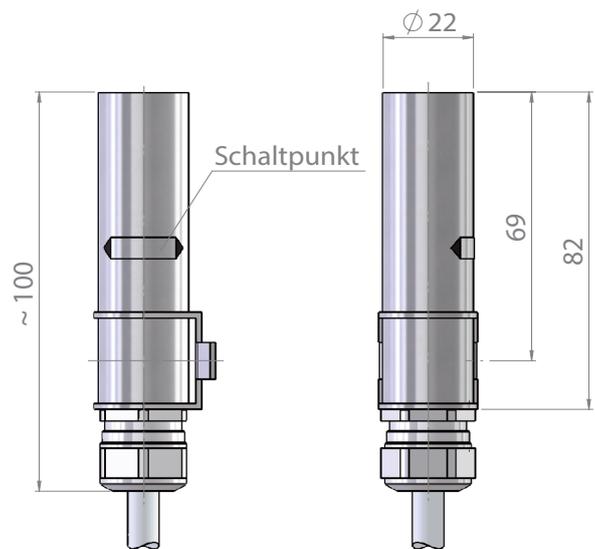

Switching contacts:

St. steel version fitted to the indicator bar

MGK-E60	Chambers up to 73 mm, Cable connection
MGK-E60EXI	Intrinsically safe acc. to ATEX
MGK-E73	Chambers ab 73 mm, Cable connection
MGK-E73EXI	Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	st. steel
Mounting /	can be positioned freely
Prot. class /	IP68
Ambient temp. /	PVC -20...+80°C SIL -40...+180°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

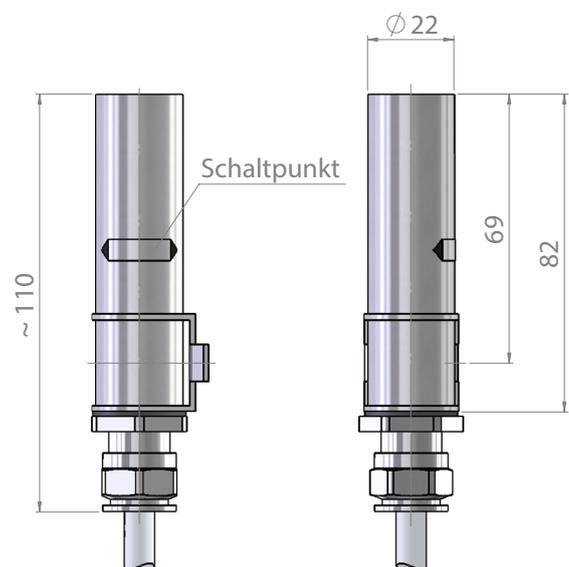

St. steel version fitted to the indicator bar

MGK-E60EXD	press.-proof encapsulation from ATEX
MGK-E73EXD	press.-proof encapsulation from ATEX

Technical Specifications

Housing /	st. steel
Mounting /	can be positioned freely
Prot. class /	IP68
Ambient temp. /	PVC -20...+80°C SIL -40...+120°C PUR -40...+80°C Radox® -35...+120°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{FN} 50 W/VA / P_{PN} 700 mW with Namur switch U_N 15 VDC / I_N 60 mA with protective resistor U_N 250 V / I_N 100 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

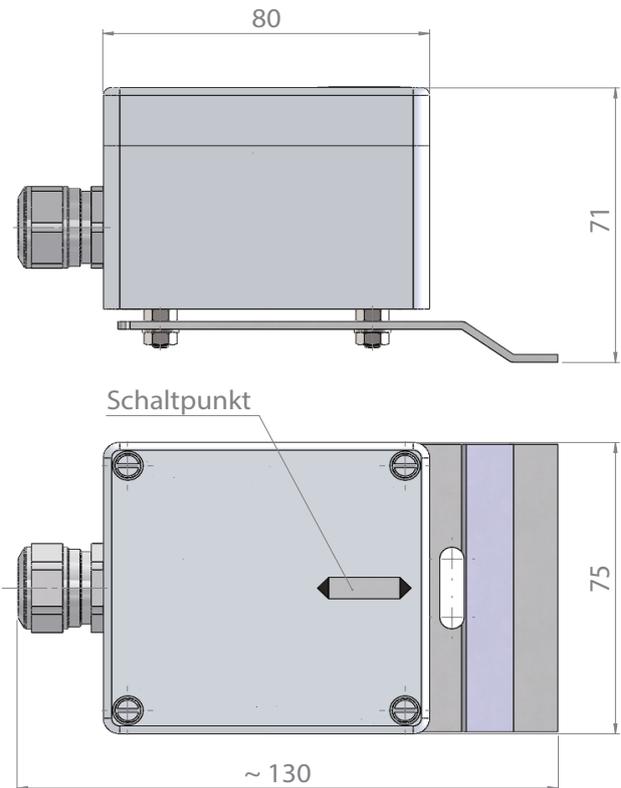

**Switching contacts:****High-temp. co-contact fitted to the indicator bar**

MGV-HTU Standard with cable gland
MGV-HTUEXI Intrinsically safe acc. to ATEX

Technical Specifications

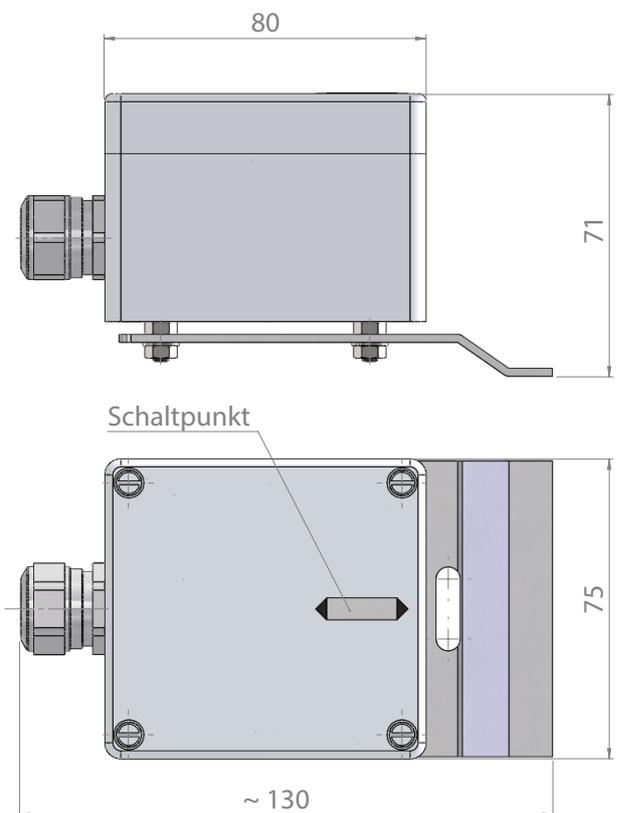

Housing /	Aluminium anodised
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-40...+300°C with Namur switch -40...+220°C with protective resistor -40...+220°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5...7 mm
poss.	
Approvals /	ATEX, GOST

**Proximity switch acc. to NAMUR fitted to the indicator bar**

MGV-NC Standard with cable gland
MGV-NCEXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium coated RAL 9006
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Amb.temp.- (ATEX) /	-40...+100°C (-40...+73°C)
Function /	nc-contact, bistable
Supply /	5...25 VDC
Nominal-voltage /	8 VDC
Self-inductance & capacity /	100 mH / 30 nF
Intrinsic safety data /	U = 16 VDC, I = 25 mA, P = 34 mW
poss.	
Approvals /	ATEX, GOST, SIL1

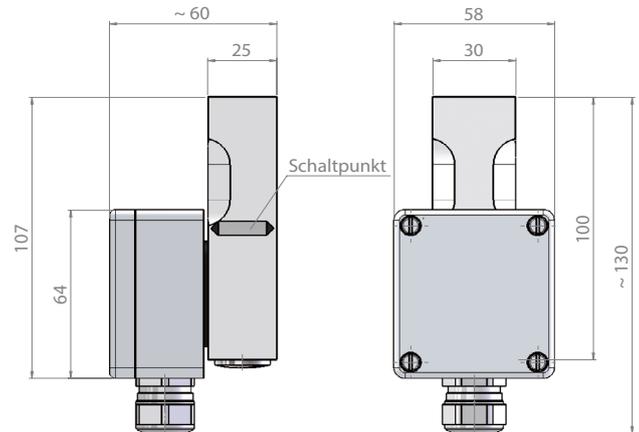

Switching contacts:

Standard co-contact fitted to the indicator bar

MGV-U Standard with cable gland
MGV-UEXI Intrinsically safe acc. to ATEX

Technical Specifications

Housing /	Aluminium anodised
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-40. . . +130°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5. . . 7 mm
poss.	
Approvals /	ATEX, GOST, GL, BV, DNV, ABS, SIL1

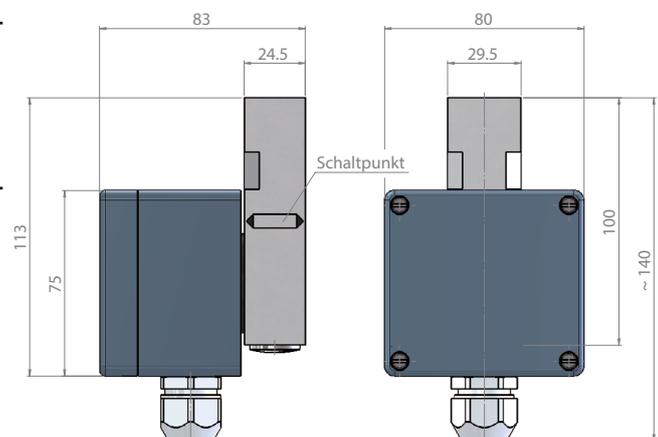

Co-contact in plastic housing fitted to the indicator bar

MGV-PU Standard with cable gland
MGV-PUEXI Intrinsically safe acc. to ATEX

Technical Specifications:

Housing /	Polyester / st. steel
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-10. . . +100°C
Function /	co-contact, increasing level, bistable
Switch rating /	230 V / 0.5 A / 40 VA
Switch rating (EX) /	Ex ia 100 mA / Ex ia NAMUR 60 mA
Hysteresis /	5. . . 7 mm
poss.	
Approvals /	ATEX, GOST, SIL1

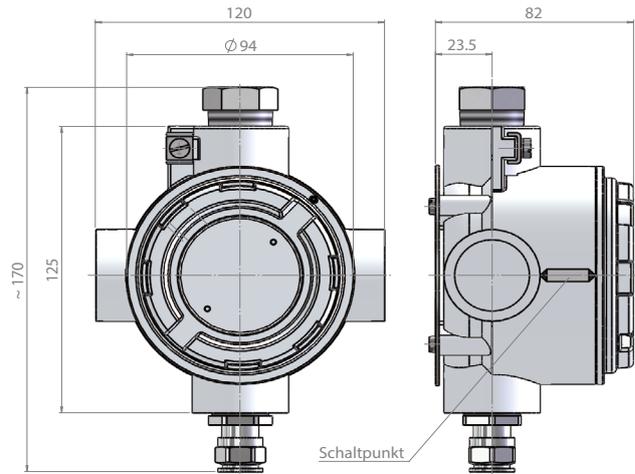

Switching contacts:

Co-contact in industrial housing fitted to the indicator bar

MGV-AUEXD press.-proof encapsulation from ATEX

Technical Specifications

Housing /	Aluminium coated RAL 9006
El. conn. /	cable gland M20 x 1,5
Mounting /	can be positioned freely
Prot. class /	IP65
Ambient temp. /	-40. . .+100°C
Function /	co-contact, increasing level, bistable
Switch rating /	U_N 250 V / P_{SN} 50 W/VA / P_{PN} 700 mW with Namur switch U_N 15 VDC / I_N 60 mA with protective resistor U_N 250 V / I_N 100 mA
Hysteresis /	5. . .7 mm
poss.	
Approvals /	ATEX, GOST, SIL1

Appendix E - Armaflex® insulation and electrical trace heating:

ART Armaflex® insulation Standard

Technical Specifications

Material /	foam plastics based on synthetic rubber
Fire behaviour /	self-extinguishing, not drippy, not flammable
Nom. thickness /	32 mm
Amb.temp. /	-50...+105°C
UV-resistance /	no

ARH Armaflex® insulation High temperature

Technical Specifications

Material /	foam plastics based on synthetic rubber
Fire behaviour /	self-extinguishing, not drippy, not flammable
Nom. thickness /	25 mm
Amb.temp. /	-50...+150°C
UV-resistance /	yes

HA Electr. trace heating up to TU = 75°C

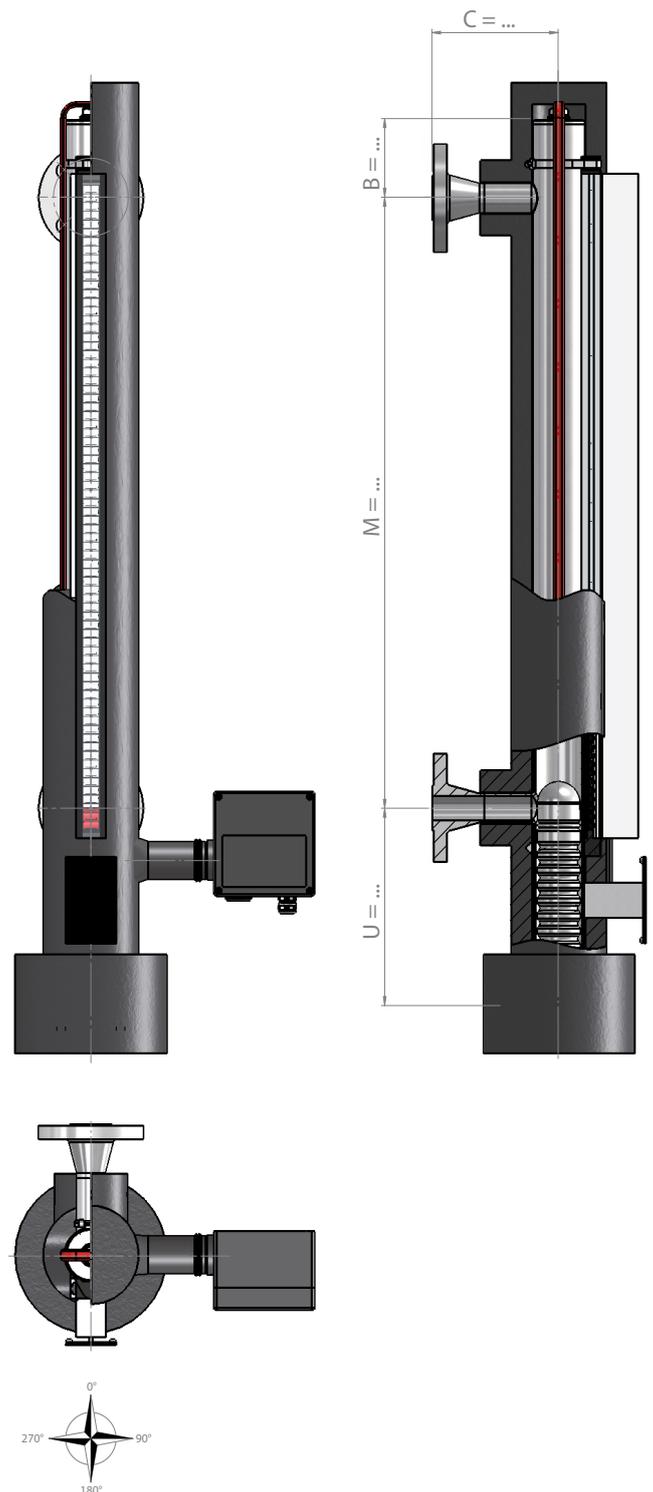

Technical Specifications

Housing /	GFK black with cable glands M25
Protective shell /	Fluorpolymer
Supply voltage /	230 VAC
Power output /	76 W per meter for 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	no
Amb.temp. /	-40...+75°C
poss. Approvals /	ATEX EExe T4, DNV

HB Electr. trace heating up to TU = 150°C

Technical Specifications

Housing /	GFK black with cable glands M25
Protective shell /	Fluorpolymer
Supply voltage /	230 VAC
Power output /	50 W pro Meter for 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	yes
Amb.temp. /	-40...+150°C
poss. Approvals /	ATEX EExe T4, DNV

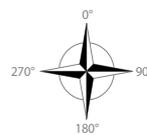

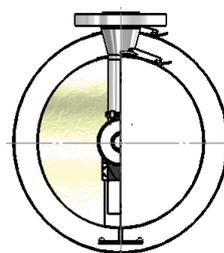

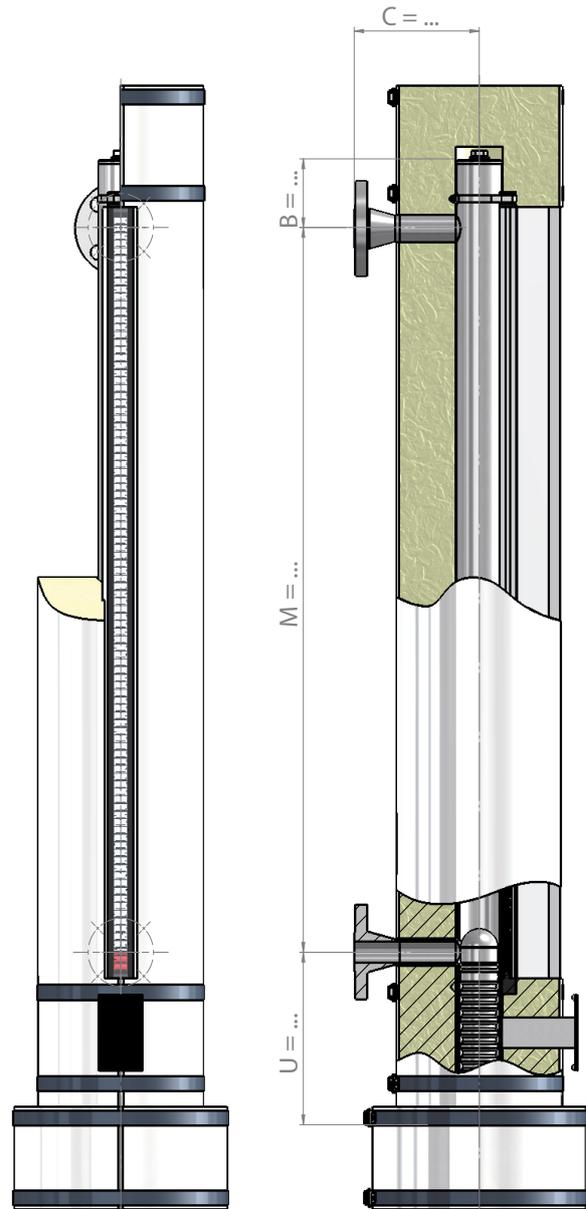

Appendix F - Rock-wool insulation:

SW Rock-wool insulation (removable)

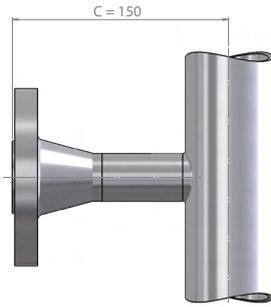

Technical Specifications

Material /	rock-wool with a chrome-nickel cover (removable)
Nom. thickness /	-50 mm
Ambient temp. /	-50. . . +750°C
UV-resistance /	yes

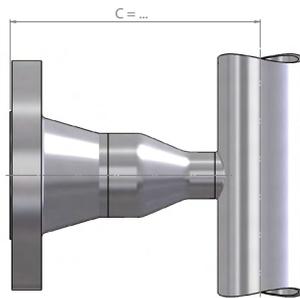

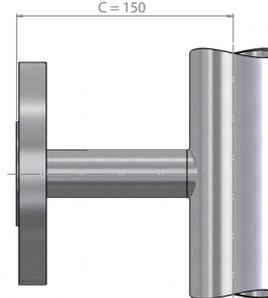

Appendix G - Prozessanschlüsse, Dämpfungsfedern und Haltelasche:

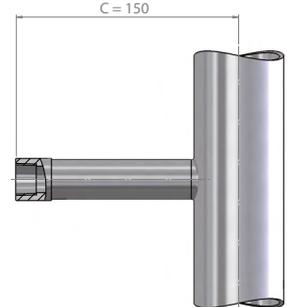

welding neck flange (standard)

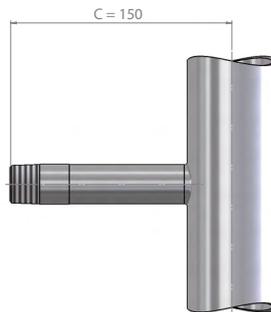

welding neck flange (reduced)

blind flange

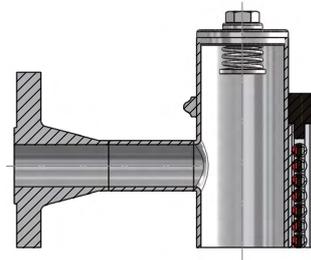

thread socket (female)

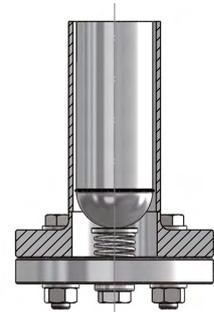

thread socket (male)

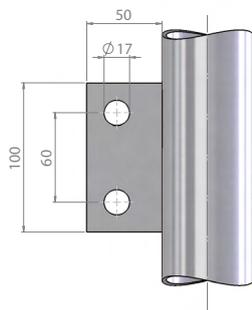

weld-on socket

upper dampening spring

lower dampening spring

mounting bracket

Welding neck flange, reduced from DN50 (2") to DN25 (1")

-* depending on the float length

MA-400M

Mini-Bypass Magnetic Level Gauge

Description:

A measuring tube made from a non-magnetizable material has two lateral connecting sleeves, which are joined with the vessel to be monitored. Since in this reference vessel the same fluid level is found as that in the tank, a cylindrical float is located always at the height with the liquid level. The float is counterbalanced exactly to the density of the medium and it carries a specially designed disc shaped magnetic system that acts through the stainless steel wall of the measuring tube on an indicator bar which is sensitive to magnetic force. Due to the magnetic force of the float, its pre-magnetized rollers are turned by 180° in such a matter, that all rollers below the float turn their red and the remaining rollers above the float turn their white side to the front. Thus, the observer obtains a precise visual statement of the level in the container. Optionally, the reference tube can be equipped with bistable, magnetic sensitive limit contacts which emit a binary signal when the float has passed the level where the sliding contacts are mounted. Another alternative to the remote transmission of value is adding a reed contact chain FM-02N externally to the measuring tube that would convert the float movement into a stepped resistance or current signal. Instead of the reed contact chain, also a magnetostrictive sensor can be used which breaks up the level at a higher accuracy and provides a 4 to 20 mA power signal in 2-wire circuit.

Features

- / Low-cost design
- / For simple applications
- / Up to 5 meter measuring length
- / Up to +6 bar
- / Up to +150°C liquid temperature
- / Flange, thread and welded connections
- / Switching contacts and measuring transmitter
- / Electrical trace heating and insulation possible
- / Customized designs

Application:

The MA-400M series of mini-bypass magnetic level gauges has been long in use in large numbers in the entire industry, thus bypass float level technology has a proven record of accurately measuring level in field for over 30 years. Meanwhile, the technology of remote transmission, for example, by using magnetostrictive sensors has been perfected to such extent that it is no way inferior to other methods of level measurement and monitoring. Moreover, the advantage here is that the level can be identified at one glance directly at the measuring point. The electrical signals in the control room can be verified visually without much assembling work. The main fields of application include the level monitoring and level controlling in tanks, agitator- and open vessels with media such as acids, alkalis, fuels, oils etc.

Versions:

Measuring range (ME):

The distance between the upper and the lower lateral connection is specified in millimeters. The maximum length of a measuring tube is 5000 mm. For a length of 2000 mm and above, we recommend equipping the magnetic level gauge with a welded bracket for additional securing (Option /7). If the free space (dugout) between the lower connecting piece and the base or the space (projection) between the upper connecting piece and the ceiling are in one way or the other restricted, the relevant maximum parameter must be specified in detailed text at the time of placing an order. In an empty vessel, the float for the MA-400M is located in the so-called float-sack below the connection and in a full tank in the projection above the connection. This means that these dimensions must correspond with at least the float length.

Measuring tube material and diameter:

As a standard the measuring tube is made of stainless steel (V4A) with a tube outer diameter of 40mm and a wall thickness of 2mm.

Process connection:

Flanges as per EN or ANSI, female and male threads or welded ends are the most commonly used features for connecting the MA-400M to the side of the vessel. Customized solutions like aligning the connecting piece on top/ below or on top/laterally or at the bottom/laterally are available on request.

Nominal diameter and pressure level for flange:

The precise name of the connecting flange on the vessel must be specified in a detailed text. Some examples are flange DIN EN 1092-1 DN25 PN16 form B1 or ANSI 1" 300 lbs RF. Standard flanges are DIN EN 1092-1 DN15 PN16 with sealing bar form B1.

Thread for screw neck or bushing:

If a screw neck or a bushing is selected as a variant for the connection, the thread size must be specified in detailed text. Here the standard is G 3/4". All normally used inch or metric thread systems are available on request.

Measuring tube connection top:

An overview of the various possible variants of the upper measuring tube connection, such as with ventilation screw, valve or flange, is located on the last pages of this data-sheet.

Measuring tube connection bottom:

An overview of the various possible variants of the lower measuring tube connection, such as with drain plug, valve or flange is located on the last pages of this data sheet.

Indicator bars:

Standard versions are colorless mattfinished aluminium and for rough atmospheres with stainless steel coated housing. Optionally rotating backed versions are available (they guarantee clean turnover of the magnetic rollers even due to vibration).

Float type and length:

The matching float is selected from the float tables of this data sheet. The criterias are material and temperature resistance to the medium. From the float length the user determines the surfacing volume of the float at a known specific gravity of the medium being measured. The ideal surfacing volume at which liquid level and magnet system are on one level is shown in bold. Also, the length of the float-sack below the lower connection and in a full tank the projection above the upper connection depends on the selected float length. Should the application be subject to space limitations, it is advisable to choose a lighter float material such as buna, thus saving on float length.

Approvals:

Various approvals are available for the magnetic level gauge type of MA-400M such as ATEX, GL, DNV, GOST, BV, ABS and, if necessary, they are tested with regard to the Pressure Equipment Directive. Since the devices are modular assembled (contacts, sensors, indicator bar etc.) it must be ensured, that all components used meet the required approval.

Options:

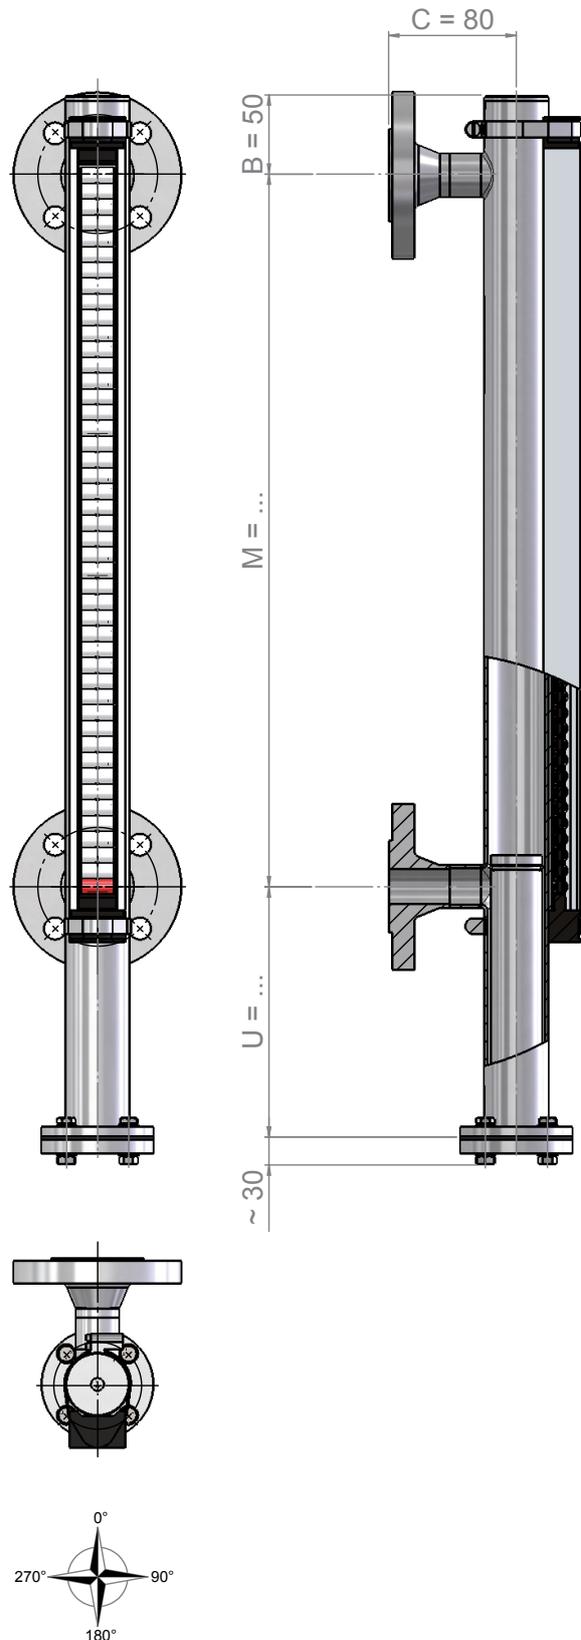

With regard to options, specify in detail whether the MA-400M should be provided with electrical limit contacts and as to how many (option /1). A circuit with a protective resistor or a combination of resistors, which offers a behavior according to NAMUR, is available for the contacts (option /2 and /3). Optionally, for remote transmission of level value a reed contact measuring transmitter (option /4 and /5) or a magnetostrictive sensor (option /6) can be mounted externally to the MA-400M which provides a 4 to 20 mA signal at the output (see also FM-01F and FM-02N for details). Mounting brackets stabilize the magnetic level gauge for lengths above 2 meters (option /7). Solid and removable insulation against cold and heat (option /10 , /11 and /12), trace heating against frost (option /13 and /14), angular scales with various engravings (option /15, /16 and /17) and a cover for concealed or isolated indicator bars (option /18) round off the equipment possibilities.

Mini-Bypass Magnetic Level Gauge made of Stainless Steel PN6 with lateral Process Connection

Technical Specifications:

Materials /	1.4404/ 1.4435/ 1.4571 (316L/ 316Ti)
Flange center distance /	150..5000 mm
spec. Weight /	≥ 560 kg/m ³
Design pressure /	-1..+6 bar
Design temp. /	-40..+150°C
Chamber /	Ø 40 x 2 mm
Process connection /	see appendix G „Process connections“
Chamber end top /	see appendix H „Chamber end top“

HA Electr. trace heating up to TU = 75°C

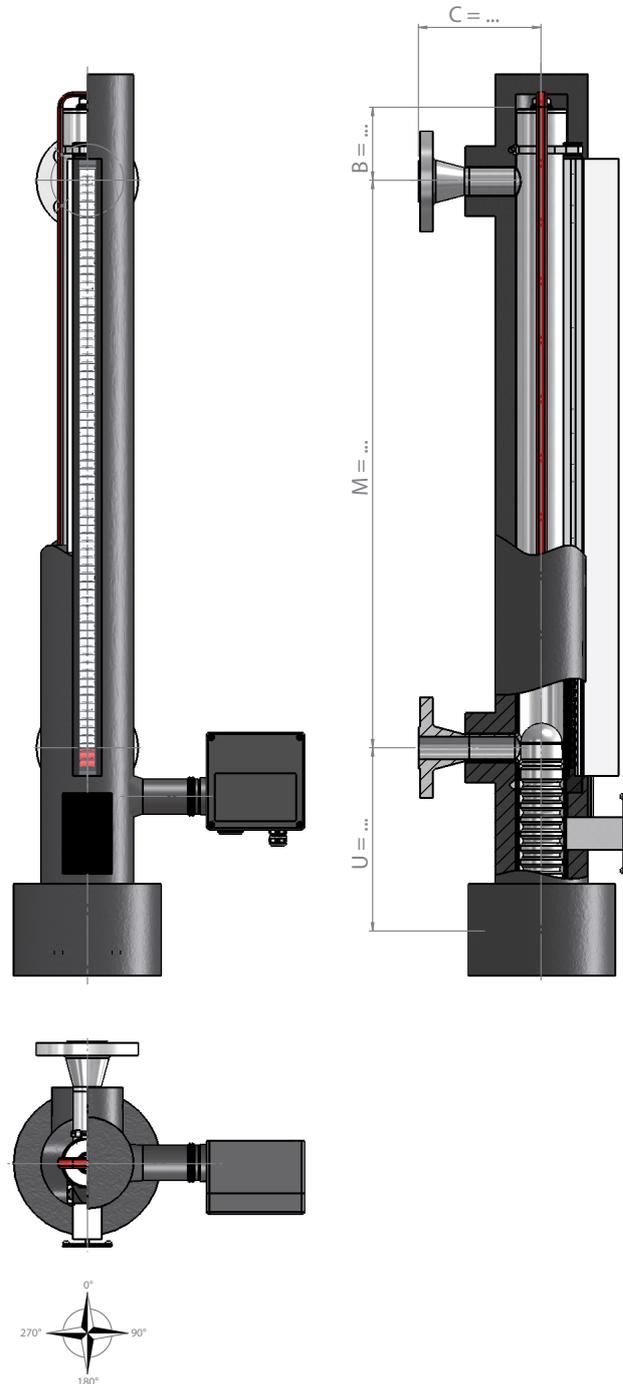

Technical specifications

Housing /	GFK black with cable gland M25
Protective shell /	fluoropolymer
Supply voltage /	230 VAC
Power output /	76 W / m at 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	no
Ambient temp. /	-40...+75°C
poss. Approvals /	ATEX EExe T4, DNV

HB Electr. trace heating up to TU = 150°C

Technical specifications

Housing /	GFK black with cable gland M25
Protective shell /	fluoropolymer
Supply voltage /	230 VAC
Power output /	50 W / m at 10°C
Holding temp. /	-10°C / frost protect. (32 mm insulation)
Steam flushing /	yes
Ambient temp. /	-40...+150°C
avail. Approvals /	ATEX EExe T4, DNV

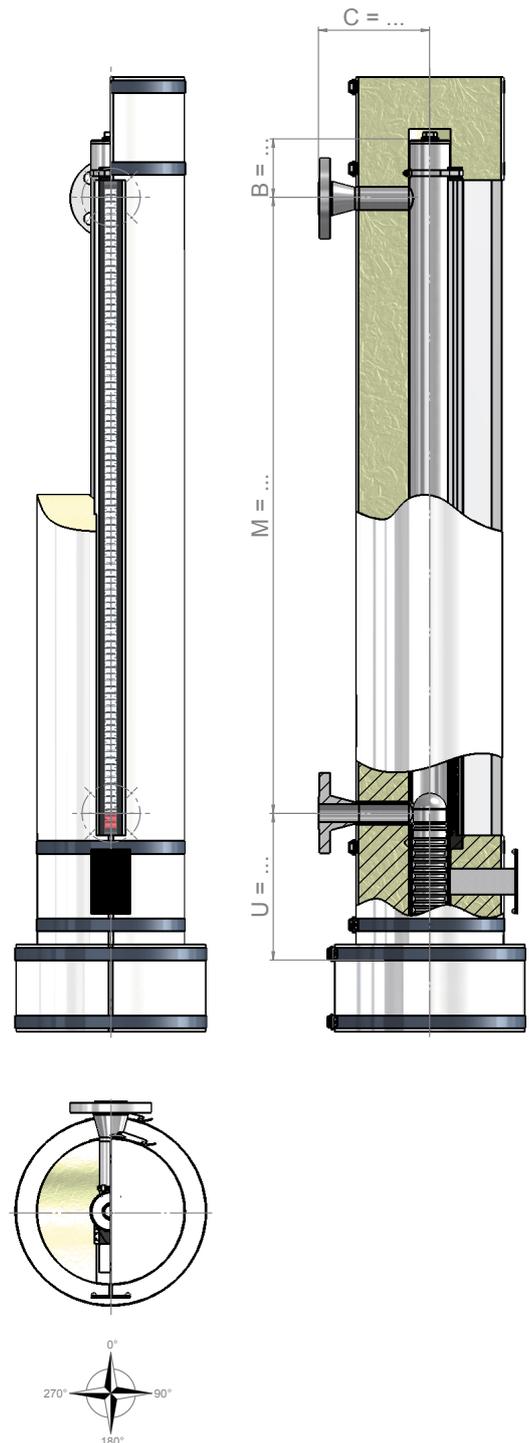

Appendix F - rock-wool insulation

SW Rock-wool insulation (removable)

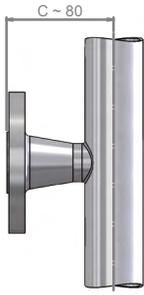

Technical specifications

Material /	rock-wool with a chrome-nickel cover (removable)
Nom. thickness /	-50 mm
Ambient temperature /	-50...+750°C
UV resistance /	yes

Appendix G - Process connections and the mounting bracket

welding neck flange
(standard)

blind flange

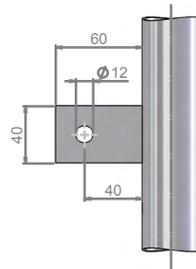

thread socket
(female)

thread socket
(male)

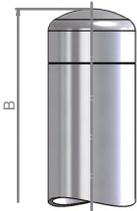

weld-on socket

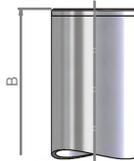

mounting bracket

Appendix H - Chamber end top

BA: welding cap

BB: flat top

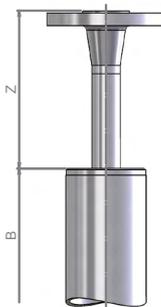

BC: flat top
with vent plug G

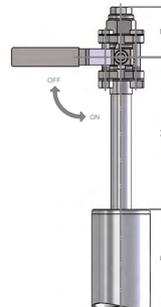

BD: flat top
with vent plug NPT

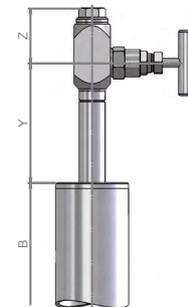

BE: flat top
with vent nozzle

BF: flat top
with vent flange

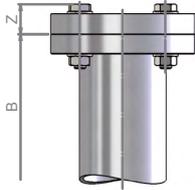

BG: flat top
with vent ball valve

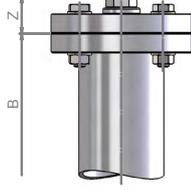

BH: flat top
with needle valve

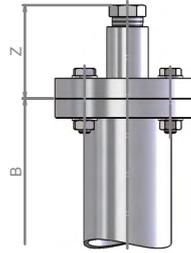

Appendix H - Chamber end top

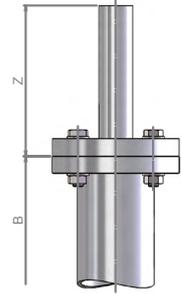

BI: flanged connection

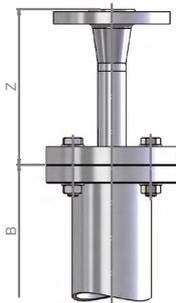

BJ: flanged connection with vent plug G

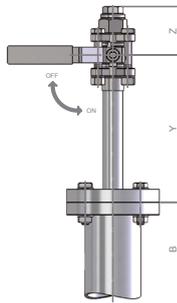

BK: flanged connection with vent plug NPT

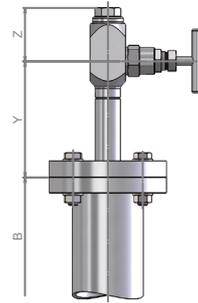

BL: flanged connection with vent nozzle

BM: flanged connection with vent flange

BN: flanged connection with vent ball valve

BO: flanged connection with vent needle valve

Chamber end top

Pressure level	6 / 150#		
	B	Y	Z
	Maße in mm		
Welding cap	-	-	-
Flat top	50	-	-
Flat top with vent plug G ¼	50	-	20
Flat top with vent plug NPT ½	50	-	30
Flat top with vent nozzle	50	-	100
Flat top with vent flange	50	-	100
Flat top with vent ball valve G	50	120	55
Flat top with vent needle valve G	50	120	50
Flanged connection	50	-	30
Flanged connection with vent plug G ¼	50	-	35
Flanged connection with vent plug NPT ½	50	-	65
Flanged connection with vent nozzle	50	-	100
Flanged connection with vent flange	50	-	100
Flanged connection with vent ball valve G	50	120	55
Flanged connection with vent needle valve G	50	120	50

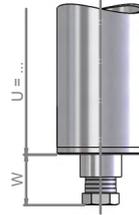

Appendix I - Chamber end bottom

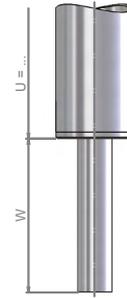

UA: flat top

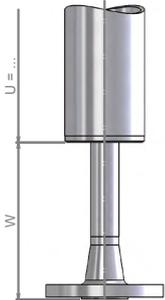

**UB: flat top
with drain plug G**

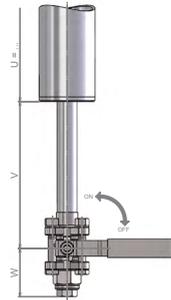

**UC: flat top
with drain plug NPT**

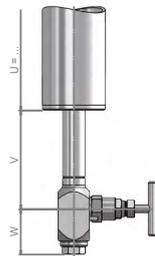

**UD: flat top
with drain nozzle**

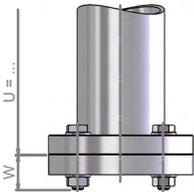

**UE: flat top
with drain flange**

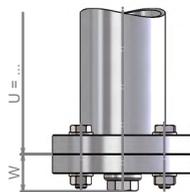

**UF: flat top
with drain ball valve**

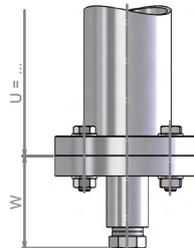

**UG: flat top
with drain needle valve**

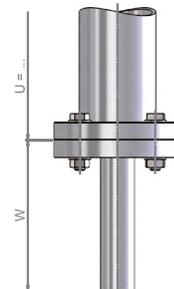

UH: flanged connection

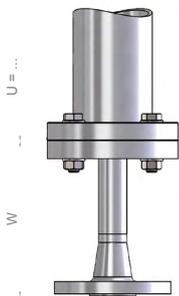

**UI: flanged connection
with drain plug G**

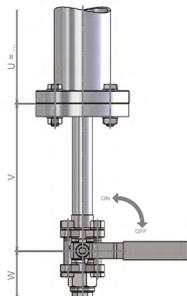

**UJ: flanged connection
with drain plug NPT**

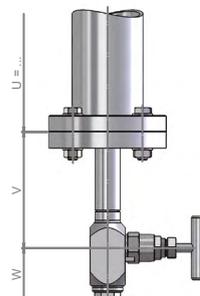

**UK: flanged connection
with drain nozzle**

**UL: flanged connection
with drain flange**

**UM: flanged connection
with drain ball valve**

**UN: flanged connection
with drain needle valve**

Chamber end bottom

Pressure level	6 / 150#		
	U	V	W
	Maße in mm		
Flat top	-*	-	-
Flat top with drain plug G ¼	-*	-	20
Flat top with drain plug NPT ½	-*	-	30
Flat top with drain nozzle	-*	-	100
Flat top with drain flange	-*	-	100
Flat top with drain ball valve G	-*	120	55
Flat top with drain needle valve G	-*	120	50
Flanged connection	-*	-	30
Flanged connection with drain plug G ¼	-*	-	35
Flanged connection with drain plug NPT ½	-*	-	65
Flanged connection with drain nozzle	-*	-	100
Flanged connection with drain flange	-*	-	100
Flanged connection with drain ball valve G	-*	120	55
Flanged connection with drain needle valve G	-*	120	50

-* depending on the float length
